EXECUTIVE SUMMARY

1.1 EXECUTIVE SUMMARY

Introduction	We received instructions from the client on 06/06/2022 to implement valuation service for a logistics project in Jeddah city.
Client	For whom this report is being prepared is Awal Al Malqa Real Estate Company, a Saudi company registered under the Saudi law.
Reference No.	22-0112-2EN
Purpose of Valuation	Real Estate Investment Trust (REIT)
Subject Property	Cold store project
Property Location	The property is located in King Faisal Naval Base district, Jeddah City.
Title Deed Information	Title Deed No: 625516001149, 425516001150, Title Deed Date: 20/11/1442 & 20/11/1442, Issued from Jeddah Notary
Ownership Type	Freehold
Owner	شركة أول الملقا العقارية
Land Use	Industrial Use
Land Area (Sqm)	Based on the title deed, the land has an area size of 21,118.53 Sqm
BUA (Sqm)	The property has a total BUA of 16,000 Sqm
GLA (Sqm)	The total gross leasable area is 16,000 Sqm
Vacancy Rate	The client informed us that the subject property is fully leased to one tenant for SAR 16,000,000/ Annually for 5 years (NNN).
Valuation Approach	Comparable Approach, DRC Approach & Income Approach
Final Property Value	SAR 220,690,000
Valuation Date	25/06/2022
Inspection Date	15/06/2022

TERMS OF REFERENCE & VALUATION

1.2 VALUATION REFERENCE

This report was prepared based on the instructions issued to us by Awal Al Malqa Real Estate Company to estimate the market value of the property / real estate that is the subject of this report for the mentioned purpose only. This report may not be used for other purposes. The valuation was prepared in accordance to the regulations and standards issued by the Saudi Authority of Accredited Valuers and the International valuation Standards of the Council of International Assessment Standards (IVSC).

1.3 BASIS OF VALUATION

Market Value

Market Value is defined as: -

The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction, after proper marketing and where the parties have each acted knowledgeably, prudently and without compulsion.

The definition of Market Value is applied in accordance with the following conceptual framework:

"The estimated amount" refers to a price expressed in terms of money payable for the asset in an arm's length market transaction. Market value is the most probable price reasonably obtainable in the market on the valuation date in keeping with the market value definition. It is the best price reasonably obtainable by the seller and the most advantageous price reasonably obtainable by the buyer. This estimate specifically excludes an estimated price inflated or deflated by special terms or circumstances such as atypical financing, sale and leaseback arrangements, special considerations or concessions granted by anyone associated with the sale, or any element of special value:

AN ASSET SHOULD EXCHANGE

"an asset should exchange" refers to the fact that the value of an asset is an estimated amount rather than a predetermined amount or actual sale price. It is the price in a transaction that meets all the elements of the market value definition at the valuation date;

ON THE VALUATION DATE

"on the valuation date" requires that the value is time specific as of a given date. Because markets and market conditions may change, the estimated value may be incorrect or inappropriate at another time. The valuation amount will reflect the market state and circumstances as at the valuation date, not those at any other date;

BETWEEN WILLING BUYER

"between a willing buyer" refers to one who is motivated, but not compelled to buy. This buyer is neither over eager nor determined to buy at any price. This buyer is also one who purchases in accordance with the realities of the current market and with current market expectations, rather than in relation to an imaginary or hypothetical market that cannot be demonstrated or anticipated to exist. The assumed buyer would not pay a higher price than the market requires. The present owner is included among those who constitute "the market";

AND
WILLING
SELLER

“**and a willing seller**” is neither an over eager nor a forced seller prepared to sell at any price, nor one prepared to hold out for a price not considered reasonable in the current market. The willing seller is motivated to sell the asset at market terms for the best price attainable in the open market after proper marketing, whatever that price may be. The factual circumstances of the actual owner are not a part of this consideration because the willing seller is a hypothetical owner;

IN AN ARM'S
LENGTH
TRANSACTION

“**in an arm's-length transaction**” is one between parties who do not have a particular or special relationship, eg parent and subsidiary companies or landlord and tenant, that may make the price level uncharacteristic of the market or inflated because of an element of special value. The market value transaction is presumed to be between unrelated parties, each acting independently;

AFTER
PROPER
MARKETING

“**after proper marketing**” means that the asset would be exposed to the market in the most appropriate manner to effect its disposal at the best price reasonably obtainable in accordance with the market value definition. The method of sale is deemed to be that most appropriate to obtain the best price in the market to which the seller has access. The length of exposure time is not a fixed period but will vary according to the type of asset and market conditions. The only criterion is that there must have been sufficient time to allow the asset to be brought to the attention of an adequate number of market participants. The exposure period occurs prior to the valuation date;

KNOWLEDGEABLY
AND
PRUDENTLY

‘**where the parties had each acted knowledgeably, prudently**’ presumes that both the willing buyer and the willing seller are reasonably informed about the nature and characteristics of the asset, its actual and potential uses and the state of the market as of the valuation date. Each is further presumed to use that knowledge prudently to seek the price that is most favorable for their respective positions in the transaction. Prudence is assessed by referring to the state of the market at the valuation date, not with benefit of hindsight at some later date. For example, it is not necessarily imprudent for a seller to sell assets in a market with falling prices at a price that is lower than previous market levels. In such cases, as is true for other exchanges in markets with changing prices, the prudent buyer or seller will act in accordance with the best market information available at the time;

AND
WITHOUT
COMPULSION

‘**and without compulsion**’ establishes that each party is motivated to undertake the transaction, but neither is forced or unduly coerced to complete it. Market value is the basis of value that is most commonly required, being an internationally recognized definition. It describes an exchange between parties that are unconnected (acting at arm's length) and are operating freely in the marketplace and represents the figure that would appear in a hypothetical contract of sale, or equivalent legal document, on the valuation date, reflecting all those factors that would be taken into account in framing their bids by market participants at large and reflecting the highest and best use of the asset. The highest and best use of an asset is the use of an asset that maximizes its productivity and that is possible, legally permissible and financially feasible. Market value is the estimated exchange price of an asset without regard to the seller's costs of sale or the buyer's costs of purchase and without adjustment for any taxes payable by either party as a direct result of the transaction.

1.4 CLIENT APPROVAL DATE

The client approval date reflects the green light given to us by the client to start the inspection procedures of the property / properties subject to the valuation process.

June 06, 2022.

1.5 INSPECTION DATE

The inspection date reflects the exact date of the property's inspection and the date of executed market survey. Yet, the outcome value of the subject property / properties will be based on the findings at the inspection date.

June 15, 2022.

1.6 VALUATION DATE

The Valuation date is the date on which the opinion of value/s applies. The date of valuation is the date where the value/s of the subject property / properties is reflected. The valuation date is at

June 25, 2022.

1.7 REPORT DATE

The valuation reports usually dated exactly as the valuation date. Yet, and in some cases, the report date can be after the valuation date depending on the nature, size, and location of the subject property.

June 25, 2022.

1.8 OPINION OF VALUE

All the outputs will be shown in this report (Values) are based on our best knowledge of the market, documents received from the client (assumed to be correct), market findings and inspection inputs. Yet, the estimated values of the subject property / properties express our opinion of values based on the previously mentioned findings.

1.9 PURPOSE OF VALUATION

The client requested to know the current market value of the subject property for **Real Estate Investment Trust (REIT) Purpose**. Therefore, and according to the valuation purpose, and as requested by the client, we will adapt the valuation methodologies of **Income Approach, Cost Approach and Comparable Approach**.

1.10 INSPECTION ROLE

A visit to a property or inspection of an asset, to examine it and obtain relevant information, in order to express a professional opinion of its value. We hereby confirm that we have inspected the subject property / Asset at the date of inspection. Our inspection procedure covers only the surface / boundaries / out layers of the property. No technical inspection has been made such as soil test, construction durability, etc. the following shows the findings from the inspection procedures.

1.11 MARKET SURVEY

During the site visit, our team has made the market survey for the immediate surrounding areas of the subject property to collect all the possible and related data to the valuation process. The collected data will be prices, rents, land offerings, properties transactions, etc. the collected data type will be according to the property data and the purpose of valuation.

PROPERTY DETAILS

2.1 PROPERTY & LOCATION DESCRIPTION

Property Description	The subject property is a cold store project located in King Faisal Naval Base district, Jeddah City. Based on the information provided by the client, and the copy of the title deed, the project has a total area of 21,118.53 Sqm and a total BUA of 16,000 Sqm. According to the site inspection done by our team for the purpose of valuation, the project is open from 3 sides with a direct view on King Faisal Road where all infrastructural facilities such as water, electricity, sewage, and telecommunication are available in the surroundings and connected to the subject property.
Location Description	The property being valued is a cold store project located on King Faisal Naval Base district, Jeddah City. The property is bordered from the north by a Private Property The property is bordered from the south by Al Kurnaysh Street The Property is bordered from the east by King Faisal Road The property is bordered to the west by an unnamed street
Ease of Access	Based on the current location of the subject property, the access level is high since it is located on King Faisal Road.
Area Surrounding the Property	The subject property is mostly surrounded by several vacant lands and warehouses

Land		Building	
Land Use	Industrial Use	Building Type	Cold Store Warehouse
No. of Streets	3	Building Structural Conditions	Fully Constructed
Land Shape	Graded	External Elevation Conditions	Good
Direct View on the Main Road	King Faisal Road	Building Finishing Conditions	Good
Direct View on an Internal Street	Al Kurnaysh Street	Overall Building Conditions	Good
Land Condition	Constructed		

2.2 INFRASTRUCTURE FACILITIES

	Available in the surrounding	Connected to the property	
Water	✓	✓	All the infrastructural facilities are available in the surroundings and connected to the subject property.
Electricity	✓	✓	
Tele-Communication	✓	✓	
Sewage	✓	✓	

2.3 LOCATION

The subject property is located in King Faisal Naval Base district, Jeddah city and surrounded by several landmarks as follows:

Property Location on a City Scale

Property Location on a District Scale

2.4 PROPERTY ACCESS

The subject property can be accessed as shown in the map below:

2.5 TITLE DEED & OWNERSHIP

We were provided with copy of the title deed related to the subject property which is owned by one title deed. The details of the subject property:

City	Jeddah	Land Area	21,118.53 sqm
District	King Faisal Naval Base	Plot No.	8, 9, 10, 11, 12, 13, 14, 15
T.D Type	Electronic	Block No.	N/A
T.D Number	62551600149, 425516001150	Layout No.	317/اس/ج
T.D Date	20/11/1442	Owner	شركة أول الملقا العقارية
T.D Value	N/A	Ownership Type	Freehold
Date of Last Transaction	20/11/1442	Limitation of Document	N/A
Issued From	Jeddah Notary		
North Side	Private Property	East Side	King Faisal Road 120 meter
South Side	32 meters street	West Side	30 meters street
Notes	The client has provided us with copy of the Title Deed which was assumed to be correct and authentic. It is not in our scope to run legal diagnosis on any legal document.		

2.6 CONSTRUCTION & BUILDINGS

The building permit indicates the maximum permissible BUA approved by the city municipality. However, the actual area may differ from the area mentioned in the building permit. Therefore, if the customer did not provide us with a copy of the approved plans, the valuation will be done based on the building permit provided by the customer. In the event that the customer does not provide us with a copy of the legal documents that show the total building surfaces, we will value them using the skills of our team along with the municipality's laws and regulations, and therefore the building surfaces will be estimated only roughly.

Source of BUA		Actual Age of the Property		Status of the property	
Construction Permit	✓	Construction Permit	✓	New	-----
As Built Drawings	-----	As Built Drawings	-----	Fully Constructed	✓

PROPERTY VALUATION

4.1 DOCUMENTS RECIEVED

The client has provided us by clear copy of the following documents.

Title Deed Copy ✓	Construction Permit ✓	Krooki
Master Plan	Layouts	3D Design & Perspectives
Pictures	Presentation of the subject property	Location Map ✓
Location Link ✓	Contact Details ✓	Costing & Budget
Tenant List	Leasing Contract	Operational Cost - OPEX

4.2 GENERAL ASSUMPTIONS

- The subject property is valued under the assumption of freehold status unless otherwise stated in the report.
- All the written and verbal information provided to us by the Client assumed to be up to date, complete and correct in relation to elements such as title deed, construction permits, land area, and any other relevant matters that are set out in the report.
- This report is a valuation report and not structural / building survey. Therefore, we did not carry out any structural due diligence, utilities check, services check, soil test, etc.
- All the inputs used in the valuation methodologies are based on the collected market data using our best know how and experience in the related market.
- The output of this report (Final Value), is based on the used assumptions, received documents from the client and available market data. Yet, the output estimates show an indicative value of the subject property / properties.

4.3 LEGAL NOTICES

We are not aware of and have not been notified of any legal notices on the property, whether they are ongoing or pending in the courts.

4.4 INFORMATION SOURCE

Referring to the purpose of this report, it has been assumed that all information received from the client, whether verbal or written, is up-to-date and correct. Our team conducted field research in order to ensure the validity of some market information for the purpose of valuation, which included the values of assets in the region, occupancy rates and market information related to the asset being valued in order to reach the market value of the asset being valued. During the field research process, some sources were relied on as follows:

- The field survey prepared by us
- Site inspection done by our team
- Our historical database for the similar assets of the property being valued
- Sales agents specialized with the same type of assets subject to valuation

4.5 STRUCTURAL EXAMINATION OF BUILDINGS (IF ANY)

Our service's scope does not include any technical testing of buildings and / or structural examinations and does not include any quality assurance of these constructions. However, in the event of any visible and observed deficiencies in the structural structure, we will write it down in our report and reflect such effect on the value.

4.6 VALUATION APPROACH

With reference to the valuation purpose, taking into consideration the nature of the subject property, we will use the following ticked methods to estimate the market value of the subject property:

	DRC	Comparable	Income Cap	DCF	RLV
Land		✓			
Building	✓				
Overall Property			✓		

COMPARABLE METHOD

This is the method most are familiar with as it is the accepted method for valuing residential real estate. Typically, this method involves selecting properties with similar characteristics in the same market area that have recently sold. Once those properties are found they are compared to the property in question and a professional appraiser will deduct value from the subject property for comparative deficiencies and increase value for advantages. Typically, this method is required if the investor is seeking conventional financing. For comparable information, property brokers, dealers and estate agents are contacted to ascertain the asking and selling prices for property of the nature in the immediate neighborhood and adjoining areas. Neighboring properties, which have been recently sold or purchased, are investigated to ascertain a reasonable selling price.

DEPRECIATED REPLACEMENT COST (DRC)

A cost approach is a real estate valuation method that surmises that the price someone should pay for a piece of property should not exceed what someone would have to pay to build an equivalent building. In cost approach pricing, the market price for the property is equivalent to the cost of land plus cost of construction, less depreciation. It is often most accurate for market value when the property is new. Generally, the cost approach considers what the land, devoid of any structures, would cost, then adds the cost of building the structures, then depreciation is subtracted. The cost approach is most often used for public buildings, such as schools and churches, because it is difficult to find recently sold comparable properties in the local market, and public buildings do not earn income, so the income approach cannot be used, either. A property that already has improvements will usually contribute a certain amount of value to the site, but improvements can also lower property value if the site's potential buyers wish to use the property for another use that would entail removing some of the improvements to the current site. The cost approach is best used when improvements are new and there is adequate pricing information to value the property components. The cost approach may be less desirable if there are no recent sales of vacant land for which to compare, since the major method of valuing vacant lands is to use the sales comparison approach, or when construction costs are not readily available. The cost approach method includes:

- Estimate what the vacant property would be worth.
- Estimate the current cost of building the structures, then add that value to the value of the vacant land.
- Estimate the amount of accrued depreciation of the subject property, then subtract it from the total to arrive at the property's worth.
-

CAPITALIZATION METHOD (CAP RATE)

The income approach values property by the amount of income that it can potentially generate. Hence, this method is used for apartments, office buildings, malls, and other property that generates a regular income.

The appraiser calculates the income according to the following steps:

- Estimate the potential annual gross income by doing market studies to determine what the property could earn, which may not be the same as what it is currently earning.
- The effective gross income is calculated by subtracting the vacancy rate and rent loss as estimated by the appraiser using market studies.
- The net operating income (NOI) is then calculated by subtracting the annual operating expenses from the effective gross income. Annual operating expenses include real estate taxes, insurance, utilities, maintenance, repairs, advertising and management expenses. Management expenses are included even if the owner is going to manage it, since the owner incurs an opportunity cost by managing it herself. The cost of capital items is not included, since it is not an operating expense. Hence, it does not include mortgage and interest, since this is a debt payment on a capital item.

Estimate the capitalization rate (aka cap rate), which is the rate of return, or yield, that other investors of property are getting in the local market.

4.7 COST APPROACH (DRC)

As a first step, and based on the market survey done by our team for the purpose of valuation, we did not find land samples similar to the subject property in terms of area size, street width, location, etc. Yet, we have executed trade interviews with several local real estate agents and found that the average square meter price in the area falls between 2,300 and 2,700 SAR/ Sqm. We will base our valuation on the average rate 2,500 SAR/ Sqm.

As per the site inspection done by our team for the purpose of valuation, we have found that the subject property is a customized cold storage warehouse. Yet, the client informed us that the total development cost of the project is 158,200,000 SAR which we believe it is an acceptable value based on the quality. To achieve the value of the property we need to apply the depreciation value and add the land value.

Total Dev Cost	SAR 158,200,000
Economic Age	20
Actual Age	5
Annual Dep Rate	5.00%
Total Dep Rate	25.00%
Dev Cost After Depreciation	SAR 118,650,000
Land Value	SAR 52,796,325
Total	SAR 171,446,325

4.8 INCOME APPROACH- LEASING CONTRACT

Actual Revenues

The client informed us that the subject property is fully leased to 1 tenant with a triple net of 16,000,000 SAR annually for 5 years.

Market Capitalization Rate Analysis

Based on recent transactions of real estate properties and funds, the average capitalization rate of acquiring such property falls in the range of 7% to 9%. This average is mainly driven by several factors such as the quality of the building, finishing materials, the general location, ease of access, actual age of the property, size of the project, and the extent of income stability in it. In addition to the above, the capitalization rates are also affected directly by the supply and demand rates for the same type of real estate

The Capitalization Rate Used for the Valuation

With regard to the capitalization rate used in the valuation, we will base our analysis on the average capitalization rates based on the market and then make some adjustments based on the property situation in terms of its characteristics, location and some other important elements.

With regard to the capitalization rate used in the valuation, we will rely on the averages of the capitalization rate by market and then make some adjustments based on the real estate situation in terms of the following:

- Easy access to the property
- The general condition of the property
- The general location of the property
- Quality of finishes
- Quality and presence of management team
- Services and public utilities

The estimated capitalization rate for the property, which will be based on the valuation process, is 7.25%, which will be applied subsequently to the net operating income of the property.

Minimum capitalization rate	7.00%	
Maximum capitalization rate	9.00%	
Average	8.00%	
The effect of the property specifications on the property		
Item	Influence	Notes
Ease of access to the property	0.00%	Average access
General condition of the property	0.00%	The actual age of the property is 23 years
The general location of the property	-0.25%	The area is served excellently
Quality and finishes	-0.25%	Good quality finishes
Project Management Team	-0.25%	Average management and operational team level
Services and public facilities	0.00%	Level and availability of services is good
Total	-0.75%	
Note: When the effect is negative (-), this reduces the capitalization rate, which increases the value of the property. And when the effect is positive (+), this increases the capitalization rate, which reduces the value of the property		
Total adjustments on capitalization rate	-0.75%	
Capitalization rate, according to market averages	8%	
Estimated capitalization rate of the property valuation	7.25%	

Based on the above, the value of the property using the income capitalization method is as follows:

REVENUES						
Unit Type	Total GLA	Quantity	No of Units	SAR / Sqm	Revenues	Total Revenues
Store Cold				The subject property is Fully leased to 1 tenant		SAR 16,000,000

Net Operating Income						SAR 16,000,000.00
Net Operating Income	Cap Rate		Property Value			Rounded Value
SAR 16,000,000.00	7.25%		220,689,655.17 SAR			220,690,000.00 SAR

4.9 INCOME APPROACH- MARKET RATES

Market Rental Analysis

The subject property is a cold storage and based on the market survey done by our team and based on the interviews done with local real estate agents, we have found that the rental rates for cold storage similar to the subject property in terms of quality, services, etc (mentioning 3 samples such as Wared Logistics, Storkom, Takhzeen Logistics) falls between 1,050 and 1,150 SAR/ Sqm. We will base our valuation on the average rate 1,100 SAR/ Sqm.

Market Capitalization Rate Analysis

Based on recent transactions of real estate properties and funds, the average capitalization rate of acquiring such property falls in the range of 7% to 9%. This average is mainly driven by several factors such as the quality of the building, finishing materials, the general location, ease of access, actual age of the property, size of the project, and the extent of income stability in it. In addition to the above, the capitalization rates are also affected directly by the supply and demand rates for the same type of real estate

The Capitalization Rate Used for the Valuation

With regard to the capitalization rate used in the valuation, we will base our analysis on the average capitalization rates based on the market and then make some adjustments based on the property situation in terms of its characteristics, location and some other important elements.

With regard to the capitalization rate used in the valuation, we will rely on the averages of the capitalization rate by market and then make some adjustments based on the real estate situation in terms of the following:

- Easy access to the property
- The general condition of the property
- The general location of the property
- Quality of finishes
- Quality and presence of management team
- Services and public utilities

The estimated capitalization rate for the property, which will be based on the valuation process, is 7.25%, which will be applied subsequently to the net operating income of the property.

Minimum capitalization rate		7.00%
Maximum capitalization rate		9.00%
Average		8.00%
The effect of the property specifications on the property		
Item	Influence	Notes
Ease of access to the property	0.00%	Average access
General condition of the property	0.00%	The actual age of the property is 23 years
The general location of the property	-0.25%	The area is served excellently
Quality and finishes	-0.25%	Good quality finishes
Project Management Team	-0.25%	Average management and operational team level
Services and public facilities	0.00%	Level and availability of services is good
Total	-0.75%	
Note: When the effect is negative (-), this reduces the capitalization rate, which increases the value of the property. And when the effect is positive (+), this increases the capitalization rate, which reduces the value of the property		
Total adjustments on capitalization rate	-0.75%	
Capitalization rate, according to market averages	8%	
Estimated capitalization rate of the property valuation	7.25%	

Based on the above, the value of the property using the income capitalization method is as follows:

REVENUES						
	Quantity			Revenues		
Unit Type	Total GLA	No of Units	SAR / Sqm	SAR / Unit	Total Revenues	
Store Cold	16,000	0	SAR 1,100	SAR 0	SAR 17,600,000	
					Total Revenues	SAR 17,600,000
EXPENSES						
Unit Type	Management	Utilities	Maintenance	Vacancy	Total Expenses	
Store Cold	0.00%	0.00%	0.00%	10.00%	10.00%	
NET OPERATING INCOME						
Unit Type	Total Revenues			Total Expenses		NOI
Store Cold	SAR 17,600,000			10.00%		SAR 15,840,000
					Total	SAR 15,840,000
Total Property Revenues					SAR 17,600,000	
Total Property Expenses					-SAR 1,760,000	
Net Operating Income					SAR 15,840,000.00	
Net Operating Income		Cap Rate		Property Value		Rounded Value
SAR 15,840,000.00		7.25%		218,482,758.62 SAR		218,480,000.00 SAR

4.10 SUBJECT PROPERTY VALUE IN DIFFERENT APPROACHES

Methodology	Subject of Valuation	Value in Numbers	Value in Letters
DRC Approach	Property	SAR 171,446,000	One Hundred Seventy- One Million and Four Hundred Forty-Six Thousand Saudi Riyals
Income- Contract	Property	SAR 220,690,000	Two Hundred Twenty Million and Six Hundred Ninety Thousand Saudi Riyals
Income- Market	Property	SAR 218,480,000	Two Hundred Eighteen Million and Four Hundred Eighty Thousand Saudi Riyals

GENERAL NOTES

5.1 CONSULTANT STATUS

We confirm that the consultant / valuator has no physical contact or affiliation with the original subject matter of valuation or with the client and can provide objective, unbiased valuation. We confirm that the valuator is competent to carry out the valuation task and has sufficient skills and market knowledge concerned to conduct the valuation.

5.2 DISCLOSING CONFLICT OF INTEREST

We affirm that we are completely independent of the customer and the subject of the valuation, and nothing contained in this agreement must be interpreted as constituting any relationship with the customer except for the normal official relationship of work, or that it aims to establish any business relationship whatsoever between the customer and White Cubes employees. We also confirm that we do not have any conflicts of interest with the customer's property. We would like to draw your attention to the following:

The subject property was previously valued by White Cubes
White Cubes was previously involved in selling activities related to the property
White Cubes was previously involved in advisory services related to the property

No	If Yes		Remarks
	Client	Date	
✓	Awal Al Malqa Real Estate Company	12/2021	-----
✓	-----	-----	-----
	-----	-----	-----

5.3 CONFIDENTIALITY

This document and / or any other documents received from the client are confidential between White Cubes. and the client. Except as may be required by any court or authority, the subject service shall not disclose or use or cause to be disclosed or used, at any time during the Term.

Any of the Client's secrets and/or confidential information, any other non-public information relating to the client business, financial or other affairs acquired by the subject service during the process remain confidential.

5.4 ENVIRONMENTAL MATTERS

We are not aware of the content of any environmental audit or other environmental investigation or soil survey which may have been carried out on the property and which may draw attention to any contamination or the possibility of any such contamination.

In undertaking our work, we have been instructed to assume that no contaminative or potentially contaminative use has ever been carried out on the property. We have not carried out any investigation into past or present uses, either of the properties or of any neighboring land, to establish whether there is any contamination or potential for contamination to the subject properties from the use or site and have therefore assumed that none exists. However, should it be established subsequently that contamination exists at the properties or on any neighboring land, or that the premises has been or is being put to any contaminative use, this might reduce the value now reported.
