Subject: Valuation Report for a Cold Store Project (AKUN Logistics) in Jeddah City, Saudi Arabia.

Dear Sir,

With reference to your request and approval dated on 8th of November 2022. We will provide you with a detailed report on the property under evaluation, including a market analysis, an economic analysis, and a description of the valuation methods. In addition, we WHITE CUBES guarantee the confidentiality of the client's information and are committed to complete impartiality in the evaluation process and acknowledge that there are no common interests between WHITECUBES and the client.

EXECUTIVE SUMMARY

EXECUTIVE
SUMMARY

Executive Summary

Reference No.	22-0327
Dep. Code	
Client	Awal Al Malqa Real Estate Company.
Report user	Awal Al Malqa Real Estate Company.
Other users	Investors or those wishing to invest in the Real Estate Investment Trust.
Purpose of Valuation	REIT semiannual valuation
Subject Property	Cold Store Project.
Property Location	King Faisal Naval Base district district, Jeddah City.
Title Deed No.	625516001149, 425516001150
Title Deed Date	20/11/1442
Ownership Type	Freehold (Mortgaged)
Owner	شركة أول الملقا العقارية
Land Use	Industrial Use
Land Area (Sqm)	The land has an area size of 21,118.53 Sqm
BUA (Sqm)	The property has a total BUA of 16,000 Sqm.
GLA (Sqm)	The total gross leasable area is 16,000 Sqm.
Basis of Value	Market Value
Value Hypothesis	Current use
Valuation Approach	Comparable Approach, Cost Approach and Income Approach.
Currency	Saudi Arabian Riyal
Final Property Value	SAR 220,690,000
Report Date	31/12/2022
Valuation Date	27/11/2022
Inspection Date	14/11/2022
Expiry Date	120 days from date of the inspection unless there're any economic changes that affect the subject property.

SCOPE OF WORK

SCOPE OF
WORK

Scope of Work

1.1 Introduction

This report was prepared by WHITE CUBES Co. based on the International Valuation Standards of the Council of International Assessment Standards (IVSC 2022) and the Guide to Practice and Regulations issued by the Saudi Authority of Accredited Valuers (Taqeem), to ensure accurate access to information, the evaluation report must be read in its entirety, our firm is pleased to offer its services to Awal Al Malqa Real Estate Company in order to estimate the market value of the property that is being evaluated.

1.2 Purpose of valuation

We conducted an evaluation of the subject property at the request of the client to determine the current market value of the property for REIT semi annual valuation.

1.3 Basis of Valuation

Market Value

Market Value is defined as: -

The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction, after proper marketing and where the parties have each acted knowledgeably, prudently and without compulsion.

The definition of Market Value is applied in accordance with the following conceptual framework:

"The estimated amount" refers to a price expressed in terms of money payable for the asset in an arm's length market transaction. Market value is the most probable price reasonably obtainable in the market on the valuation date in keeping with the market value definition. It is the best price reasonably obtainable by the seller and the most advantageous price reasonably obtainable by the buyer. This estimate specifically excludes an estimated price inflated or deflated by special terms or circumstances such as atypical financing, sale and leaseback arrangements, special considerations or concessions granted by anyone associated with the sale, or any element of special value;

"An asset should exchange" refers to the fact that the value of an asset is an estimated amount rather than a predetermined amount or actual sale price. It is the price in a transaction that meets all the elements of the market value definition at the valuation date;

"On the valuation date" requires that the value is time specific as of a given date. Because markets and market conditions may change, the estimated value may be incorrect or inappropriate at another time. The valuation amount will reflect the market state and circumstances as at the valuation date, not those at any other date;

"Between a willing buyer" refers to one who is motivated, but not compelled to buy. This buyer is neither over eager nor determined to buy at any price. This buyer is also one who purchases in accordance with the realities of the current market and with current market expectations, rather than in relation to an imaginary or hypothetical market that cannot be demonstrated or anticipated to exist. The assumed buyer would not pay a higher price than the market requires. The present owner is included among those who constitute "the market;"

"And a willing seller" is neither an over eager nor a forced seller prepared to sell at any price, nor one prepared to hold out for a price not considered reasonable in the current market. The willing seller is motivated to sell the asset at market terms for the best price attainable in the open market after proper marketing, whatever that price may be. The factual circumstances of the actual owner are not a part of this consideration because the willing seller is a hypothetical owner;

"In an arm's-length transaction" is one between parties who do not have a particular or special relationship, parent and subsidiary companies or landlord and tenant, that may make the price level uncharacteristic of the market or inflated because of an element of special value. The market value transaction is presumed to be between unrelated parties, each acting independently;

"After proper marketing" means that the asset would be exposed to the market in the most appropriate manner to affect its disposal at the best price reasonably obtainable in accordance with the market value definition. The method of sale is deemed to be that most appropriate to obtain the best price in the market to which the seller has access. The length of exposure time is not a fixed period but will vary according to the type of asset and market conditions. The only criterion is that there must have been sufficient time to allow the asset to be brought to the attention of an adequate number of market participants. The exposure period occurs prior to the valuation date;

'Where the parties had each acted knowledgeably, prudently' presumes that both the willing buyer and the willing seller are reasonably informed about the nature and characteristics of the asset, its actual and potential uses, and the state of the market as of the valuation date. Each is further presumed to use that knowledge prudently to seek the price that is most favorable for their respective positions in the transaction. Prudence is assessed by referring to the state of the market at the valuation date, not with benefit of hindsight at some later date. For example, it is not necessarily imprudent for a seller to sell assets in a market with falling prices at a price that is lower than previous market levels. In such cases, as is true for other exchanges in markets with changing prices, the prudent buyer or seller will act in accordance with the best market information available at the time;

'And without compulsion' establishes that each party is motivated to undertake the transaction, but neither is forced or unduly coerced to complete it. Market value is the basis of value that is most required, being an internationally recognized definition. It describes an exchange between parties that are unconnected (acting at arm's length) and are operating freely in the marketplace and represents the figure that would appear in a hypothetical contract of sale, or equivalent legal document, on the valuation date, reflecting all those factors that would be considered in framing their bids by market participants at large and reflecting the highest and best use of the asset. The highest and best use of an asset is the use of an asset that maximizes its productivity and that is possible, legally permissible, and financially feasible. Market value is the estimated exchange price of an asset without regard to the seller's costs of sale or the buyer's costs of purchase and without adjustment for any taxes payable by either party as a direct result of the transaction.

1.4 Valuation Methods

Depending on the purpose of the valuation, and upon the request of the client, we will apply the comparable approach, cost approach and income approach.

1.5 Currency

Unless otherwise stated, all values in the report are in Saudi Arabian Riyals.

1.6 Scope of Research

As part of the appraisal process, our team conducted a field survey of the surrounding area of the property in question and similar properties to ensure their authenticity.

1.7 Property Inspection

Inspection refers to visiting and inspecting an asset, testing its performance, and gathering information about it from quantities, specifications, land area, building areas, rental areas, services, public utilities, project components, etc., so that an opinion can be expressed regarding its value. Therefore, we confirm that subject property was inspected on 14/11/2022 with its specifications, as well, we note that this wasn't a technical inspection, but rather a preview and recording of everything that was seen.

1.8 Information Sources

An on-site field survey was conducted by our team to ensure the accuracy of some market information required for the evaluation, including nearby asset prices, occupancy rates, and specific information about the asset under evaluation, to determine its actual market value. The following sources were used during the field research process:

- Title deed and construction permit.
- Field survey.
- The site preview.
- Our historical database of similar assets.
- Agents specializing in the same type of asset.

1.9 Assumptions and Special Assumptions

As defined by the International Valuation Standards, assumptions are logical matters that can be accepted as facts during evaluation work without being specifically checked or scrutinized. They are accepted as soon as they are mentioned. Based on the facts at the time of the valuation.

- The property under evaluation has been evaluated based on absolute ownership.
- Assumed that all information received from the client is accurate and up to date as of the date of the evaluation, whether oral or written.
- This is an evaluation report rather than a structural survey. As a result, we did not conduct any utility checks, service checks, soil tests, etc.
- The valuation methodologies are based on market data compiled using our relevant market knowledge and experience.
- This report's output (final value) is derived from assumptions used, documents received from the client, and market data. Nevertheless, the output estimates provide an indication of the property's value.

1.10 Use, Distribution, and Publication Restrictions

To estimate the market value of the assets being evaluated, WHITE CUBES Co. has prepared this report. There are restrictions on the transfer, referencing, and presentation of this report and its contents to any other party except as stipulated in the contract letter, and the client must obtain our prior written consent in order to use this report for any other purpose other than that stated in this report.

1.11 Legal Notes

As far as we are aware, no legal notices have been served on the property, whether they are in progress or pending in the court system.

WHITE **CUBES**

PROPERTY DETAILS

PROPERTY
DETAILS

Property and Location Description

2.1 Property Description

The subject property is a cold store project located in King Faisal Naval Base district, Jeddah City. Based on the provided copy of the title deed the subject property has a total land area of 21,118.53 sqm and as per the provided construction permit the total BUA of 16,000 Sqm. As per the site inspection done by our team for the purpose of valuation, the land open on 3 sides with a direct view on King Faisal Road from the east side.

2.2 Surrounding Area

the subject property is surrounded mostly by several residential and mix-use buildings.

2.3 Ease of Access

Based on the current location of the subject property, the access level is high since it is located on King Faisal Road.

2.4 Infrastructure

All the infrastructural facilities are available in the surroundings and connected to the subject property.

2.5 Title Deed and Ownership

The client provides us with copy of the title deeds related to the subject property which is owned by one title deed. The details of the subject property:

City	Jeddah	Land Area	21,118.53 Sqm
District	King Faisal Naval Base	Plot No.	8, 9, 10, 11, 12, 13, 14, 15
T.D Type	Electronic	Block No.	N/A
T.D Number	625516001149, 425516001150	Layout No.	س/ج/317
T.D Date	20/11/1442	Owner	Awal Al Malqa Real Estate Company
T.D Value	N/A	Ownership Type	Freehold
Date of Last Transaction	20/11/1442	Limitation of Document	Mortgaged
Issued From	Ministry of Justice		
North Side	Private property	East Side	120 meters street
South Side	32 meters street	West Side	30 meters street

Note: The client has provided us with copy of the Title Deed which was assumed to be correct and authentic. It is not in our scope to run legal diagnosis on any legal document.

2.6 Construction and Buildings

The building permit indicates the maximum permissible BUA approved by the city municipality. However, the actual area may differ from the area mentioned in the building permit. Therefore, the Client has provided us with a copy of the Construction Permit issued by Riyadh Municipality with the below details:

Subject Property	
Construction Permit Type	----
Property Type	----
Construction Permit No.	----
Construction Permit Date	----

We have not been provided with a Construction Permit.

WHITE **CUBES**

PROPERTY VALUATION

PROPERTY
VALUATION

Property Valuation

4 Valuation Methods

With reference to the valuation purpose, taking into consideration the nature of the subject property, we will use the following ticked methods to estimate the market value of the subject property:

	Market Approach	Cost Approach	Income Approach			
	Comparable method	DRC method	DCF method	Invest. method	Cap. Rate method	RLV method
Land	✓	----	----	----	----	----
Buildings	----	✓	----	----	----	----
Property	----	----	----	----	✓	----

CAPITALIZATION METHOD (CAP RATE)

The income approach values property by the amount of income that it can potentially generate. Hence, this method is used for apartments, office buildings, malls, and other property that generates a regular income.

The appraiser calculates the income according to the following steps:

- Estimate the potential annual gross income by doing market studies to determine what the property could earn, which may not be the same as what it is currently earning.
- The effective gross income is calculated by subtracting the vacancy rate and rent loss as estimated by the appraiser using market studies.
- The net operating income (NOI) is then calculated by subtracting the annual operating expenses from the effective gross income. Annual operating expenses include real estate taxes, insurance, utilities, maintenance, repairs, advertising, and management expenses. Management expenses are included even if the owner is going to manage it, since the owner incurs an opportunity cost by managing it herself. The cost of capital items is not included since it is not an operating expense. Hence, it does not include mortgage and interest since this is a debt payment on a capital item.

Estimate the capitalization rate (aka cap rate), which is the rate of return, or yield, that other investors of property are getting in the local market.

COMPARABLE METHOD

This is the method most are familiar with as it is the accepted method for valuing residential real estate. Typically, this method involves selecting properties with similar characteristics in the same market area that have recently sold. Once those properties are found they are compared to the property in question and a professional appraiser will deduct value from the subject property for comparative deficiencies and increase value for advantages. Typically, this method is required if the investor is seeking conventional financing. For comparable information, property brokers, dealers and estate agents are contacted to ascertain the asking and selling prices for property of the nature in the immediate neighborhood and adjoining areas. Neighboring properties, which have been recently sold or purchased, are investigated to ascertain a reasonable selling price.

DEPRECIATED REPLACEMENT COST (DRC)

A cost approach is a real estate valuation method that surmises that the price someone should pay for a piece of property should not exceed what someone would have to pay to build an equivalent building. In cost approach pricing, the market price for the property is equivalent to the cost of land plus cost of construction, less depreciation. It is often most accurate for market value when the property is new. Generally, the cost approach considers what the land, devoid of any structures, would cost, then adds the cost of building the structures, then depreciation is subtracted. The cost approach is most often used for public buildings, such as schools and churches, because it is difficult to find recently sold comparable properties in the local market, and public buildings do not earn income, so the income approach cannot be used, either. A property that already has improvements will usually contribute a certain amount of value to the site, but improvements can also lower property value if the site's potential buyers wish to use the property for another use that would entail removing some of the improvements to the current site. The cost approach is best used when improvements are new and there is adequate pricing information to value the property components. The cost approach may be less desirable if there are no recent sales of vacant land for which to compare, since the major method of valuing vacant lands is to use the sales comparison approach, or when construction costs are not readily available. The cost approach method includes:

- Estimate what the vacant property would be worth.
- Estimate the current cost of building the structures, then add that value to the value of the vacant land.
- Estimate the amount of accrued depreciation of the subject property, then subtract it from the total to arrive at the property's worth.

4.1 Comparable Approach

This method aims to collect data and information on actual sales and / or current offers of similar properties within the surrounding market, and then make the necessary adjustments to these comparisons in terms of area, location, shape, quality, content, and others. Below is a summary of the valuation process using the comparable method and the amendments made to the available comparisons

Characteristics of Samples			
Feature	Subject Property		Sample 1
Quoting	-----		Offering
District	King Faisal Naval Base		King Faisal Naval Base
Sale Price	-----		SAR 23,840,000
Data Source	Title Deed		Market Survey
Area Size	21,118.53		8,500.00
SAR / Sqm	-----		SAR 2,805
Sides Open	3		4
Adjustment Analysis			
			SAMPLE 1
Area size	21,118.53	8,500.00	-2.50.00%
Location Desirability	Average	Average	0.00%
Accessibility	Average	Average	0.00%
Main Street Width (m)	120	40	-5.00%
Sides Open	3	4	-2.50.00%
Land Shape	Regular	Regular	0.00%
Close to main street	Yes	Yes	0.00%
Negotiable	-----	Yes	0.00%
Other Factor	-----	-----	0.00%
Total Adjustments Ratio			-10.00%
Total Adjustment Amount			-SAR 280.5
Net After Adjustment			SAR 2,524.2
SAR / Sqm		SAR 2,524	
Rounded Value		SAR 2,500	

SENSITIVITY ANALYSIS					
	-10%	-5%	0%	5%	10%
Land Area	21,118	21,118	21,118	21,118	21,118
SAR / Sqm	SAR 2,250.0	SAR 2,375.0	SAR 2,500.0	SAR 2,625.0	SAR 2,750.0
Property Value	SAR 47,516,063	SAR 50,155,844	SAR 52,795,625	SAR 55,435,406	SAR 58,075,188
			PROPERTY VALUE		

As a first step, and based on the market survey done by our team for the purpose of valuation, we did not find land samples similar to the subject property in terms of area size, street width, location, etc. Yet, we have executed trade interviews with several local real estate agents and found that the average square meter price in the area falls between 2,300 and 2,700 SAR/ Sqm. We will base our valuation on the average rate 2,500 SAR/ Sqm.

4.2 Depreciated Replacement Cost (DRC) Approach

As a first step, the cost of reconstructing the building (the cost of replacement) was estimated, based on the average construction costs of similar properties and at the same level of finishes, services, utilities, and others. The opinion of some engineering experts was used in this regard. The following table shows the expected replacement costs for such property.

As per the site inspection done by our team for the purpose of valuation, we have found that the subject property is a customized cold storage warehouse. Yet, the client informed us that the total development cost of the project is 158,200,000 SAR which we believe it is an acceptable value based on the quality. To achieve the value of the property we need to apply the depreciation value and add the land value.

Total Dev Cost	SAR 158,200,000
Economic Age	20
Actual Age	5
Annual Dep Rate	5.00%
Total Dep Rate	25.00%
Dev Cost After Depreciation	SAR 118,650,000
Land Value	SAR 52,796,325
Total	SAR 171,446,325

4.3 Income Approach- Leasing Contract

Actual Revenues

The client informed us that the subject property is fully leased to 1 tenant with a triple net of 16,000,000 SAR annually for 5 years.

Market Capitalization Rate Analysis

Based on recent transactions of real estate properties and funds, the average capitalization rate of acquiring such property falls in the range of 7% to 9%. This average is mainly driven by several factors such as the quality of the building, finishing materials, the general location, ease of access, actual age of the property, size of the project, and the extent of income stability in it. In addition to the above, the capitalization rates are also affected directly by the supply and demand rates for the same type of real estate

The Capitalization Rate Used for the Valuation

With regard to the capitalization rate used in the valuation, we will base our analysis on the average capitalization rates based on the market and then make some adjustments based on the property situation in terms of its characteristics, location and some other important elements.

With regard to the capitalization rate used in the valuation, we will rely on the averages of the capitalization rate by market and then make some adjustments based on the real estate situation in terms of the following:

- Easy access to the property
- The general condition of the property
- The general location of the property
- Quality of finishes
- Quality and presence of management team
- Services and public utilities

The estimated capitalization rate for the property, which will be based on the valuation process, is 7.25%, which will be applied subsequently to the net operating income of the property.

Minimum capitalization rate	7.00%
Maximum capitalization rate	9.00%
Average	8.00%

The effect of the property specifications on the property		
Item	Influence	Notes
Ease of access to the property	0.00%	Average access
General condition of the property	0.00%	The actual age of the property is 23 years
The general location of the property	-0.25%	The area is served excellently
Quality and finishes	-0.25%	Good quality finishes
Project Management Team	-0.25%	Average management and operational team level
Services and public facilities	0.00%	Level and availability of services is good
Total	-0.75%	

Note: When the effect is negative (-), this reduces the capitalization rate, which increases the value of the property. And when the effect is positive (+), this increases the capitalization rate, which reduces the value of the property

Total adjustments on capitalization rate	-0.75%
Capitalization rate, according to market averages	8%
Estimated capitalization rate of the property valuation	7.25%

Based on the above, the value of the property using the income capitalization method is as follows:

REVENUES					
Unit Type	Quantity	Revenues			
Unit Type	Total GLA	No of Units	SAR / Sqm	SAR / Unit	Total Revenues
Store Cold		The subject property is Fully leased to 1 tenant			SAR 16,000,000
				Total Revenues	SAR 16,000,000

EXPENSES					
Unit Type	Management	Utilities	Maintenance	Others	Total Expenses
Store Cold	0.00%	0.00%	0.00%	0.00%	0.00%

NET OPERATING INCOME			
Unit Type	Total Revenues	Total Expenses	NOI
Store Cold	SAR 16,000,000	0.00%	SAR 16,000,000
		Total	SAR 16,000,000

Total Property Revenues	SAR 16,000,000
Total Property Expenses	SAR 0
Net Operating Income	SAR 16,000,000.00

Net Operating Income	Cap Rate	Property Value	Rounded Value
SAR 16,000,000.00	7.25%	220,689,655.17 SAR	220,690,000.00 SAR

4.4 Income Approach- Market Rates

Market Rental Analysis

The subject property is a cold storage and based on the market survey done by our team and based on the interviews done with local real estate agents, we have found that the rental rates for cold storage similar to the subject property in terms of quality, services, etc (mentioning 3 samples such as Wared Logistics, Storkom, Takhzeen Logistics) falls between 1,050 and 1,150 SAR/ Sqm. We will base our valuation on the average rate 1,100 SAR/ Sqm.

Market Capitalization Rate Analysis

Based on recent transactions of real estate properties and funds, the average capitalization rate of acquiring such property falls in the range of 7% to 9%. This average is mainly driven by several factors such as the quality of the building, finishing materials, the general location, ease of access, actual age of the property, size of the project, and the extent of income stability in it. In addition to the above, the capitalization rates are also affected directly by the supply and demand rates for the same type of real estate

The Capitalization Rate Used for the Valuation

With regard to the capitalization rate used in the valuation, we will base our analysis on the average capitalization rates based on the market and then make some adjustments based on the property situation in terms of its characteristics, location and some other important elements.

With regard to the capitalization rate used in the valuation, we will rely on the averages of the capitalization rate by market and then make some adjustments based on the real estate situation in terms of the following:

- Easy access to the property
- The general condition of the property
- The general location of the property
- Quality of finishes
- Quality and presence of management team
- Services and public utilities

The estimated capitalization rate for the property, which will be based on the valuation process, is 7.25%, which will be applied subsequently to the net operating income of the property.

Minimum capitalization rate	7.00%
Maximum capitalization rate	9.00%
Average	8.00%
The effect of the property specifications on the property	
Item	Influence Notes
Ease of access to the property	0.00% Average access
General condition of the property	0.00% The actual age of the property is 23 years
The general location of the property	-0.25% The area is served excellently
Quality and finishes	-0.25% Good quality finishes
Project Management Team	-0.25% Average management and operational team level
Services and public facilities	0.00% Level and availability of services is good
Total	-0.75%
<i>Note: When the effect is negative (-), this reduces the capitalization rate, which increases the value of the property. And when the effect is positive (+), this increases the capitalization rate, which reduces the value of the property</i>	
Total adjustments on capitalization rate	-0.75%
Capitalization rate, according to market averages	8%
Estimated capitalization rate of the property valuation	7.25%

Based on the above, the value of the property using the income capitalization method is as follows:

REVENUES					
	Quantity			Revenues	
Unit Type	Total GLA	No of Units	SAR / Sqm	SAR / Unit	Total Revenues
Store Cold	16,000	0	SAR 1,100	SAR 0	SAR 17,600,000
Total Revenues					SAR 17,600,000
EXPENSES					
Unit Type	Management	Utilities	Maintenance	Vacancy	Total Expenses
Store Cold	0.00%	0.00%	0.00%	10.00%	10.00%
NET OPERATING INCOME					
Unit Type	Total Revenues		Total Expenses		NOI
Store Cold	SAR 17,600,000		10.00%		SAR 15,840,000
Total					SAR 15,840,000
Total Property Revenues					SAR 17,600,000
Total Property Expenses					-SAR 1,760,000
Net Operating Income					SAR 15,840,000.00
Net Operating Income		Cap Rate	Property Value		Rounded Value
SAR 15,840,000.00		7.25%	218,482,758.62 SAR		218,480,000.00 SAR

4.5 Subject Property Value in Different Approaches

Methodology	Subject of Valuation	Value in Numbers	Value in Letters
DRC Approach	Property	SAR 171,446,000	One Hundred Seventy- One Million and Four Hundred Forty-Six Thousand Saudi Riyals
Income- Contract	Property	SAR 220,690,000	Two Hundred Twenty Million and Six Hundred Ninety Thousand Saudi Riyals
Income- Market	Property	SAR 218,480,000	Two Hundred Eighteen Million and Four Hundred Eighty Thousand Saudi Riyals
