Subject: Valuation Report for an Under Construction Educational Facility Vision Training Center (Al Farabi Previously) in Riyadh City, Saudi Arabia.

Dear Sir,

With reference to your request and approval dated on 8th of November 2022. We will provide you with a detailed report on the property under evaluation, including a market analysis, an economic analysis, and a description of the valuation methods. In addition, we WHITE CUBES guarantee the confidentiality of the client's information and are committed to complete impartiality in the evaluation process and acknowledge that there are no common interests between WHITECUBES and the client.

EXECUTIVE SUMMARY

EXECUTIVE
SUMMARY

Executive Summary

Reference No.	22-0327
Dep. Code	
Report Type	Detailed Report.
Client	Awal Al Malqa Real Estate Company.
Report user	Awal Al Malqa Real Estate Company.
Other users	Investors or those wishing to invest in the Real Estate Investment Trust.
Purpose of Valuation	REIT semi annual valuation.
Subject Property	Educational Facility.
Property Location	Ishbiliya district, Riyadh City.
Title Deed No.	598507008764
Title Deed Date	15/10/1442
Ownership Type	Freehold (Mortgaged).
Owner	شركة أول الملقا العقارية
Land Use	Educational
Land Area (Sqm)	The land has an area size of 11,340 Sqm
BUA (Sqm)	As per the provided construction permit, the total BUA is 37,448.66 Sqm.
Vacancy Rate	Based on the leasing contract provided by the client, the subject property is fully leased to one tenant, although the property is still under development.
Basis of Value	Market Value.
Value Hypothesis	Current use.
Valuation Approach	Comparable Approach and Cost Approach.
Currency	Saudi Arabian Riyal
Final Property Value	SAR 81,960,000
Report Date	31/12/2022
Valuation Date	27/11/2022
Inspection Date	14/11/2022
Expiry Date	120 days from date of the inspection, unless there're any economic changes that affect the subject property.

SCOPE OF WORK

SCOPE OF
WORK

Scope of Work

1.1 Introduction

This report was prepared by WHITE CUBES Co. based on the International Valuation Standards of the Council of International Assessment Standards (IVSC 2022) and the Guide to Practice and Regulations issued by the Saudi Authority of Accredited Valuers (Taqeem), to ensure accurate access to information, the evaluation report must be read in its entirety, our firm is pleased to offer its services to Awal Al Malqa Real Estate Company in order to estimate the market value of the property that is being evaluated.

1.2 Purpose of valuation

We conducted an evaluation of the subject property at the request of the client to determine the current market value of the property REIT semi annual valuation.

1.3 Basis of Valuation

Market Value

Market Value is defined as: -

The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's length transaction, after proper marketing and where the parties have each acted knowledgeably, prudently and without compulsion.

The definition of Market Value is applied in accordance with the following conceptual framework:

"The estimated amount" refers to a price expressed in terms of money payable for the asset in an arm's length market transaction. Market value is the most probable price reasonably obtainable in the market on the valuation date in keeping with the market value definition. It is the best price reasonably obtainable by the seller and the most advantageous price reasonably obtainable by the buyer. This estimate specifically excludes an estimated price inflated or deflated by special terms or circumstances such as atypical financing, sale and leaseback arrangements, special considerations or concessions granted by anyone associated with the sale, or any element of special value;

"An asset should exchange" refers to the fact that the value of an asset is an estimated amount rather than a predetermined amount or actual sale price. It is the price in a transaction that meets all the elements of the market value definition at the valuation date;

"On the valuation date" requires that the value is time specific as of a given date. Because markets and market conditions may change, the estimated value may be incorrect or inappropriate at another time. The valuation amount will reflect the market state and circumstances as at the valuation date, not those at any other date;

"Between a willing buyer" refers to one who is motivated, but not compelled to buy. This buyer is neither over eager nor determined to buy at any price. This buyer is also one who purchases in accordance with the realities of the current market and with current market expectations, rather than in relation to an imaginary or hypothetical market that cannot be demonstrated or anticipated to exist. The assumed buyer would not pay a higher price than the market requires. The present owner is included among those who constitute "the market;"

"And a willing seller" is neither an over eager nor a forced seller prepared to sell at any price, nor one prepared to hold out for a price not considered reasonable in the current market. The willing seller is motivated to sell the asset at market terms for the best price attainable in the open market after proper marketing, whatever that price may be. The factual circumstances of the actual owner are not a part of this consideration because the willing seller is a hypothetical owner;

"In an arm's-length transaction" is one between parties who do not have a particular or special relationship, parent and subsidiary companies or landlord and tenant, that may make the price level uncharacteristic of the market or inflated because of an element of special value. The market value transaction is presumed to be between unrelated parties, each acting independently;

"After proper marketing" means that the asset would be exposed to the market in the most appropriate manner to affect its disposal at the best price reasonably obtainable in accordance with the market value definition. The method of sale is deemed to be that most appropriate to obtain the best price in the market to which the seller has access. The length of exposure time is not a fixed period but will vary according to the type of asset and market conditions. The only criterion is that there must have been sufficient time to allow the asset to be brought to the attention of an adequate number of market participants. The exposure period occurs prior to the valuation date;

'Where the parties had each acted knowledgeably, prudently' presumes that both the willing buyer and the willing seller are reasonably informed about the nature and characteristics of the asset, its actual and potential uses, and the state of the market as of the valuation date. Each is further presumed to use that knowledge prudently to seek the price that is most favorable for their respective positions in the transaction. Prudence is assessed by referring to the state of the market at the valuation date, not with benefit of hindsight at some later date. For example, it is not necessarily imprudent for a seller to sell assets in a market with falling prices at a price that is lower than previous market levels. In such cases, as is true for other exchanges in markets with changing prices, the prudent buyer or seller will act in accordance with the best market information available at the time;

'And without compulsion' establishes that each party is motivated to undertake the transaction, but neither is forced or unduly coerced to complete it. Market value is the basis of value that is most required, being an internationally recognized definition. It describes an exchange between parties that are unconnected (acting at arm's length) and are operating freely in the marketplace and represents the figure that would appear in a hypothetical contract of sale, or equivalent legal document, on the valuation date, reflecting all those factors that would be considered in framing their bids by market participants at large and reflecting the highest and best use of the asset. The highest and best use of an asset is the use of an asset that maximizes its productivity and that is possible, legally permissible, and financially feasible. Market value is the estimated exchange price of an asset without regard to the seller's costs of sale or the buyer's costs of purchase and without adjustment for any taxes payable by either party as a direct result of the transaction.

1.4 Valuation Methods

Depending on the purpose of the valuation, and upon the request of the client, we will apply the comparable approach and cost approach.

1.5 Currency

Unless otherwise stated, all values in the report are in Saudi Arabian Riyals.

1.6 Scope of Research

As part of the appraisal process, our team conducted a field survey of the surrounding area of the property in question and similar properties to ensure their authenticity.

1.7 Property Inspection

Inspection refers to visiting and inspecting an asset, testing its performance, and gathering information about it from quantities, specifications, land area, building areas, rental areas, services, public utilities, project components, etc., so that an opinion can be expressed regarding its value. Therefore, we confirm that subject property was inspected on 14/11/2022 with its specifications, as well, we note that this wasn't a technical inspection, but rather a preview and recording of everything that was seen.

1.8 Information Sources

An on-site field survey was conducted by our team to ensure the accuracy of some market information required for the evaluation, including nearby asset prices, occupancy rates, and specific information about the asset under evaluation, to determine its actual market value. The following sources were used during the field research process:

- Title deed and construction permit.
- Field survey.
- The site preview.
- Our historical database of similar assets.
- Agents specializing in the same type of asset.

1.9 Assumptions and Special Assumptions

As defined by the International Valuation Standards, assumptions are logical matters that can be accepted as facts during evaluation work without being specifically checked or scrutinized. They are accepted as soon as they are mentioned. Based on the facts at the time of the valuation.

- The property under evaluation has been evaluated based on absolute ownership.
- Assumed that all information received from the client is accurate and up to date as of the date of the evaluation, whether oral or written.
- This is an evaluation report rather than a structural survey. As a result, we did not conduct any utility checks, service checks, soil tests, etc.
- The valuation methodologies are based on market data compiled using our relevant market knowledge and experience.
- This report's output (final value) is derived from assumptions used, documents received from the client, and market data. Nevertheless, the output estimates provide an indication of the property's value.

1.10 Use, Distribution, and Publication Restrictions

To estimate the market value of the assets being evaluated, WHITE CUBES Co. has prepared this report. There are restrictions on the transfer, referencing, and presentation of this report and its contents to any other party except as stipulated in the contract letter, and the client must obtain our prior written consent in order to use this report for any other purpose other than that stated in this report.

1.11 Legal Notes

As far as we are aware, no legal notices have been served on the property, whether they are in progress or pending in the court system.

WHITE **CUBES**

PROPERTY DETAILS

PROPERTY
DETAILS

Property and Location Description

2.1 Property Description

The subject property is Vision Training Center (Previously Al Farabi) it is an under construction educational facility with a land area of 11,340 square meters. As per the provided information by construction permit, the subject property has a total BUA of 37,448.66 square meters, overlooking four streets, with a direct view on Al Bahar Al Arabi Street. from the west side.

2.2 Surrounding Area

the subject property is surrounded mostly by several residential and commercial buildings.

2.3 Ease of Access

Based on the current location of the subject property, the access level is medium since it is located on Al Bahar Al Arabi Street.

2.4 Infrastructure

All the infrastructural facilities are available in the surroundings and not yet connected to the subject property.

2.5 Title Deed and Ownership

The client provides us with copy of the title deeds related to the subject property which is owned by one title deed. The details of the subject property:

City	Riyadh	Land Area	11,340 Sqm
District	Ishbiliya	Plot No.	From Plot No. 9 to No.16
T.D Type	Electronic	Block No.	---
T.D Number	598507008764	Layout No.	2932
T.D Date	15/10/1442	Owner	Awal Al Malqa Real Estate Company
T.D Value	42,000,000 SAR	Ownership Type	Freehold
Date of Last Transaction	15/10/1442	Limitation of Document	Mortgaged
Issued From	Ministry of Justice		
North Side	15 meters street	East Side	15 meters street
South Side	15 meters street	West Side	40 meters street

Note: The client has provided us with copy of the Title Deed which was assumed to be correct and authentic. It is not in our scope to run legal diagnosis on any legal document.

2.6 Construction and Buildings

The building permit indicates the maximum permissible BUA approved by the city municipality. However, the actual area may differ from the area mentioned in the building permit. Therefore, the Client has provided us with a copy of the Construction Permit issued by Riyadh Municipality with the below details:

Subject Property			
Construction Permit Type	New Permit		
Property Type	Educational Facility		
Construction Permit No.	1434/20267		
Construction Permit Date	1434/11/10		

Description	No. of Units	Area (sqm)	Use
Ground Floor	1	5946.95	Educational
Basement 3	0	11,322	Parking
Basement 2	0	11,322	Parking
Basement 1	0	11,322	Parking
First Floor	0	6060.61	Educational
Electricity Chamber	0	20.00	Electricity
Upper Annexes	0	2777.10	Educational
Fences	1	430.96	Fences
Total BAU (sqm)		48,770.66	

As per the provided construction permit, the total BUA is 48,770.66, But one of the basements never been build. Therefor the total BUA is 37,448.66 Sqm which will be used in our valuation analysis.

PROPERTY VALUATION

PROPERTY
VALUATION

Property Valuation

4 Valuation Methods

With reference to the valuation purpose, taking into consideration the nature of the subject property, we will use the following ticked methods to estimate the market value of the subject property:

	Market Approach	Cost Approach	Income Approach			
	Comparable method	DRC method	DCF method	Invest. method	Cap. Rate method	RLV method
Land	✓	----	----	----	----	----
Buildings	----	✓	----	----	----	----
Property	----	----	----	----	----	----

COMPARABLE METHOD

This is the method most are familiar with as it is the accepted method for valuing residential real estate. Typically, this method involves selecting properties with similar characteristics in the same market area that have recently sold. Once those properties are found they are compared to the property in question and a professional appraiser will deduct value from the subject property for comparative deficiencies and increase value for advantages. Typically, this method is required if the investor is seeking conventional financing. For comparable information, property brokers, dealers and estate agents are contacted to ascertain the asking and selling prices for property of the nature in the immediate neighborhood and adjoining areas. Neighboring properties, which have been recently sold or purchased, are investigated to ascertain a reasonable selling price.

DEPRECIATED REPLACEMENT COST (DRC)

A cost approach is a real estate valuation method that surmises that the price someone should pay for a piece of property should not exceed what someone would have to pay to build an equivalent building. In cost approach pricing, the market price for the property is equivalent to the cost of land plus cost of construction, less depreciation. It is often most accurate for market value when the property is new. Generally, the cost approach considers what the land, devoid of any structures, would cost, then adds the cost of building the structures, then depreciation is subtracted. The cost approach is most often used for public buildings, such as schools and churches, because it is difficult to find recently sold comparable properties in the local market, and public buildings do not earn income, so the income approach cannot be used, either. A property that already has improvements will usually contribute a certain amount of value to the site, but improvements can also lower property value if the site's potential buyers wish to use the property for another use that would entail removing some of the improvements to the current site. The cost approach is best used when improvements are new and there is adequate pricing information to value the property components. The cost approach may be less desirable if there are no recent sales of vacant land for which to compare, since the major method of valuing vacant lands is to use the sales comparison approach, or when construction costs are not readily available. The cost approach method includes:

Estimate what the vacant property would be worth.

Estimate the current cost of building the structures, then add that value to the value of the vacant land.

Estimate the amount of accrued depreciation of the subject property, then subtract it from the total to arrive at the property's worth.

4.1 Comparable Approach

This method aims to collect data and information on actual sales and / or current offers of similar properties within the surrounding market, and then make the necessary adjustments to these comparisons in terms of area, location, shape, quality, content, and others. Below is a summary of the valuation process using the comparable method and the amendments made to the available comparisons

Characteristics of Samples			
Feature	Subject Property		Sample 1
Quoting	-----		Offering
District	Ishbilia		Ishbilia
Sale Price	-----		SAR 52,000,000
Data Source	Title Deed		Market Survey
Area Size	11,340.00		15,000.00
SAR / Sqm	-----		SAR 3,467
Sides Open	4		4
Adjustment Analysis			
		SAMPLE 1	
Area size	11,340.00	15,000.00	-2.50%
Location Desirability	Average	Average	0.00%
Accessibility	Average	Average	5.00%
Street Width (m)	40	35	0.00%
Sides Open	4	4	0.00%
Land Shape	Regular	Regular	0.00%
Close to main street	Yes	Yes	0.00%
Negotiable	-----	No	0.00%
Other Factor	-----	-----	0.00%
Total Adjustments Ratio			2.50%
Total Adjustment Amount			SAR 86.7
Net After Adjustment			SAR 3,553.3
SAR / Sqm		SAR 3,553	
Rounded Value		SAR 3,500	

SENSITIVITY ANALYSIS					
	-10%	-5%	0%	5%	10%
Land Area	11,340	11,340	11,340	11,340	11,340
SAR / Sqm	SAR 1,912.5	SAR 2,018.8	SAR 3,500.0	SAR 2,231.3	SAR 2,337.5
Property Value	SAR 32,600,475	SAR 34,411,613	SAR 39,690,000	SAR 38,033,888	SAR 39,845,025
PROPERTY VALUE					

Based on the market samples obtained with the assistance of some real estate experts in the region and the inspection made by our team, the average price for similar properties falls in the range of 3,000 - 4,000 SAR / Sqm with an average of 3,500 SAR / Sqm. When comparing with the results of the analysis of comparisons, we found that the property value falls within the same range and is close to the market average values.

4.2 Depreciated Replacement Cost (DRC) Approach

As a first step, the cost of reconstructing the building (the cost of replacement) was estimated, based on the average construction costs of similar properties and at the same level of finishes, services, utilities, and others. The opinion of some engineering experts was used in this regard. The following table shows the expected replacement costs for such property.

	Min Cost (SAR / Sqm)	Max Cost (SAR / Sqm)	Average Cost
Skeleton - Concrete Cost	SAR 1,100	SAR 1,200	SAR 1,150
MEP	SAR 350	SAR 450	SAR 400
Finishing Materials	SAR 650	SAR 750	SAR 700
Site Improvements	SAR 80	SAR 120	SAR 100
Developer Profit	18%	22%	20%

In the following table, we will estimate the direct replacement cost of the property taking into consideration the main components of the building, such as the concrete structure, electromechanical work, finishes, site improvements, etc. Then we will estimate the value of the indirect costs as a percentage of the total direct costs to estimate the total construction costs of the project

LAND			
	Land Area	SAR / Sqm	Total Value
	11,340.00	SAR 3,500	SAR 39,690,000

Building		
	Unit	Total BUA
Upper and Underground Floors	Sqm	37,448.66
Total (SQM)	37,448.66	

Development Cost					
Hard Cost					
	Area	SAR / Sqm	Total	Completion Rate	Total Cost
Skeleton & Block	37,448.66	SAR 1,150	SAR 43,065,959	80%	SAR 34,452,767
Electro Mechanic	37,448.66	SAR 400	SAR 14,979,464	0%	SAR 0
Finishing	37,448.66	SAR 900	SAR 26,214,062	0%	SAR 0
Fit outs & Appliances	37,448.66	SAR 200	SAR 7,489,732	0%	SAR 0
Furniture	37,448.66	SAR 0	SAR 0	0%	SAR 0
Site Improvement	11,340.00	SAR 100	SAR 1,134,000	100%	SAR 1,134,000
Total			SAR 92,883,217	1134000.00%	SAR 35,586,767

Overall Soft Cost			
	Total Hard Cost	Ratio	Soft Cost
Initial Project Pre Cost	SAR 35,586,767	1.00%	SAR 355,868
Design	SAR 35,586,767	1.00%	SAR 355,868
Eng Consultant	SAR 35,586,767	2.00%	SAR 711,735
Management	SAR 35,586,767	2.00%	SAR 711,735
Contingency	SAR 35,586,767	5.00%	SAR 1,779,338
Others	SAR 35,586,767	0.00%	SAR 0
TOTAL		11.00%	SAR 3,914,544.39
Total Hard Cost	SAR 35,586,767	BUA	37,448.66
Total Soft Cost	SAR 3,914,544.39	SAR / Sqm	SAR 1,055
Total Construction Cost	SAR 39,501,311.59	Overall Completion	1134000.0%

After knowing the total construction costs at a rate of 1,055 SAR per square meter, we will estimate the economic life of the property according to the type of construction and its general condition, then apply the depreciation rates based on the actual age of the property. The developer's profitability will be added to the property's value after depreciation to reflect the estimated market value of the building

DEVELOPMENT VALUE			
Total Dev Cost	SAR 39,501,312	Net Dep Rate	0.00%
		Dev Cost After Depreciation	SAR 39,501,312
Economic Age	40		
Annual Dep Rate	2.50%	Total Completion Rate	1134000.00%
		Developer Profit Rate	7.0%
Actual Age	0		
Total Dep Rate	0.00%		
Add Appr Rate	0.00%	Dev. Profit Amount	SAR 2,765,092
Net Dep Rate	0.00%	Development Value	SAR 42,266,403

In order to determine the full value of the property, the construction costs will be added to the market value of the land as follows:

Total Dev. Value	Land Value	Total Property Value	Rounded Value
SAR 42,266,403	SAR 39,690,000	SAR 81,956,403	SAR 81,960,000

4.3 SUBJECT PROPERTY VALUE IN DIFFERENT APPROACHES

Methodology	Subject of Valuation	Value in Numbers	Value in Letters
Comparable Approach	Land	SAR 39,690,000	Thirty-nine million six hundred ninety thousand Saudi Riyals
DRC Approach	Land + Building	SAR 81,960,000	Eighty-one million nine hundred sixty thousand Saudi Riyals

4.4 Subject Property Value

We are of an opinion that the total market value of the subject property taking into consideration the purpose of valuation by using the Depreciated Replacement Cost Approach is:

Property Value: 81,960,000 SAR
Eighty-one million nine hundred sixty thousand Saudi Riyals.

4.5 Conclusion

We trust that this report and valuation fulfills the requirement of your instruction. The contents, formats, methodology and criteria outlined in this report are pending copyright.
