SCOPE OF WORK

SCOPE OF
WORK

Scope of Work

1.1 Introduction

This report was prepared by WHITE CUBES Co. based on the International Valuation Standards of the Council of International Assessment Standards (IVSC 2022) and the Guide to Practice and Regulations issued by the Saudi Authority of Accredited Valuers (Taqeem), to ensure accurate access to information, the evaluation report must be read in its entirety, our firm is pleased to offer its services to:

Awal Al Malqa Real Estate Company in order to estimate the **fair value** of the property that is being evaluated.

1.2 Purpose of valuation

The client requested that we evaluate the subject properties for **Inclusion in financial statements**.

1.3 Basis of Valuation

Fair Value: IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is based on the principle of an "exit price,"

1.4 Valuation Methods

Depending on the purpose of the valuation, and upon the request of the client, we will apply **the market approach-comparable method, cost approach-DRC method and Income approach- capitalization method (CAP RATE)**.

1.5 Currency

Unless otherwise stated, all values in the report are in Saudi Arabian Riyals.

1.6 Scope of Research

Research plays a pivotal role in the valuation process as it enables a comprehensive analysis of various factors that can significantly influence the value of a property or asset. Our valuation approach involves conducting extensive research and analysis to ensure a robust evaluation. This includes investigating market conditions, studying comparable sales data, examining key property characteristics, assessing income potential, and considering pertinent legal and regulatory factors. By diligently conducting thorough research, we aim to provide an accurate and well-informed assessment of the property or asset's value in this valuation report.

1.7 Property Inspection

As per the context of this valuation report, involves a comprehensive visit to the subject property for the purpose of assessing its physical attributes, performance, and gathering relevant information. This includes examining quantities, specifications, land area, building areas, rental areas, services, public utilities, and various project components. The inspection carried out on **20/11/2023** provided an opportunity to observe and record the property's specifications. It should be noted that this inspection was not a technical examination but rather a visual overview and documentation of all observed aspects. This information forms the basis for expressing an opinion regarding the property's value in this valuation report.

1.8 Information Sources

A comprehensive on-site field survey was undertaken by our team with the primary objective of verifying the accuracy of crucial market information essential for the evaluation process. This involved gathering data on various factors such as nearby asset prices, occupancy rates, and specific details pertaining to the asset under evaluation. The following sources were diligently utilized during the extensive field research:

1. **Property Records:** Property ownership documents such as title deeds and construction permit.
2. **Market Trends:** In-depth analysis of prevailing market trends to understand the dynamics and influences impacting the asset's value within its specific industry or sector.
3. **Income Analysis:** Rigorous assessment of income-related factors, including revenue streams, operating expenses, and potential cash flows, to gauge the asset's financial performance and viability.
4. **Inspection:** Direct observation and meticulous inspection of the asset, encompassing its physical condition, amenities, and any discernible factors that might influence its market value.
5. **Historical Database:** Reference to our extensive historical database housing information on comparable assets to draw meaningful comparisons and insights into market trends, pricing patterns, and value fluctuation over time.
6. **Specialist Agents:** Consultation and engagement with industry experts and agents specializing in the same type of asset to gain valuable insights, expert opinions, and up-to-date market intelligence.

By employing these comprehensive research methodologies, we have ensured the collection of accurate and relevant data, which forms the basis for determining the true market value of the asset under evaluation.

1.9 Assumptions and Special Assumptions

In accordance with the International Valuation Standards, assumptions play a crucial role in the evaluation process. They are considered logical matters that are accepted as facts during the valuation work, without requiring specific verification. These assumptions are acknowledged as soon as they are mentioned and are based on the factual information available at the time of the valuation. The following assumptions have been made for this evaluation report:

1. **Absolute Ownership:** The property under evaluation is assumed to have absolute ownership, implying that there are no legal or ownership disputes affecting its market value.
2. **Accuracy of Client Information:** It is assumed that all information provided by the client, whether oral or written, is accurate and up to date as of the date of the evaluation.
3. **Valuation Report Scope:** This report focuses on valuation and does not encompass a structural survey. Therefore, utility checks, service checks, soil tests, and similar assessments have not been conducted.
4. **Market-Based Valuation Methodologies:** The valuation methodologies employed in this report are based on market data compiled using our relevant market knowledge and experience. These methodologies provide a framework for estimating the property's value.
5. **Output and Estimates:** The final value presented in this report is derived from the assumptions used, documents received from the client, and relevant market data. However, it is important to note that the estimated output provides an indication of the property's value and should be interpreted as such.

By acknowledging and incorporating these assumptions into the evaluation process, we aim to provide a comprehensive and reliable assessment of the property's market value.

1.10 Use, Distribution, and Publication Restrictions

This report has been prepared by WHITE CUBES Co. to determine the fair value of the assets under evaluation. Please note that there are limitations on the transfer, referencing, and disclosure of this report and its contents to any third party, except as explicitly stated in the contract letter. Any use of this report for purposes other than those specified herein requires prior written consent from WHITE CUBES Co.

1.11 Legal Notes

To the best of our knowledge, there are no ongoing or pending legal notices served on the property, as per the information accessible to us at this time.

WHITE **CUBES**

PROPERTY DETAILS

PROPERTY
DETAILS

Property and Location Description

2.1 Property Description

The subject property is a cold store project located in King Faisal Naval Base district, Jeddah city, Kingdom of Saudi Arabia. The property's title deed documents confirm a total land area of 21,118.53 square meters and a total built-up area (BUA) of 16,000 square meters.

During our site inspection conducted for the purpose of valuation, it was observed that the property is open on 3 sides. Notably, the property offers a direct view of King Faisal Road from the east side, enhancing its desirability and potential accessibility.

2.2 Surrounding Area

The subject property is primarily surrounded by warehouses and mix-use buildings.

2.3 Ease of Access

The access level of the subject property is classified as high due to its location on King Faisal Road.

2.4 Infrastructure

All the infrastructural facilities are available in the surroundings and connected to the subject property.

2.5 Title Deed and Ownership

The client has provided us with a copy of the title deeds pertaining to the subject property, which is jointly owned by two title deeds. Here are the details of the subject property:

City	Jeddah	Land Area	21,118.53 Sqm
District	King Faisal Naval Base	Plot No.	8, 9, 10, 11, 12, 13, 14, 15
T.D Type	Electronic	Block No.	N/A
T.D Number	625516001149, 425516001150	Layout No.	ج/317
T.D Date	20/11/1442	Ownership Type	Freehold
Owner	Awal Al Malqa Real Estate Company	Limitation of Document	None
Issued From	Ministry of Justice		
North Side	Private property.	East Side	120 meters street.
South Side	32 meters street.	West Side	30 meters street.

Note: The client has provided us with a copy of the Title Deed which was assumed to be correct and authentic. It is not in our scope to run legal diagnosis on any legal document.

2.6 Construction and Buildings

The building permit indicates the maximum permissible BUA approved by the city municipality. However, the actual area may differ from the area mentioned in the building permit.

PROPERTY VALUATION

PROPERTY
VALUATION

Property Valuation

4.1 Valuation Methods

With reference to the valuation purpose, taking into consideration the nature of the subject property, we will use the following ticked methods to estimate the fair value of the subject property:

	Market Approach	Cost Approach	Income Approach			
	Comparable method	DRC method	DCF method	Invest. method	Cap. Rate method	RLV method
Land	✓	----	----	----	----	----
Buildings	----	✓	----	----	----	----
Property	----	----	----	----	✓	----

COMPARABLE METHOD

This is the method most are familiar with as it is the accepted method for valuing residential real estate. Typically, this method involves selecting properties with similar characteristics in the same market area that have recently sold. Once those properties are found they are compared to the property in question and a professional appraiser will deduct value from the subject property for comparative deficiencies and increase value for advantages. Typically, this method is required if the investor is seeking conventional financing. For comparable information, property brokers, dealers and estate agents are contacted to ascertain the asking and selling prices for property of the nature in the immediate neighborhood and adjoining areas. Neighboring properties, which have been recently sold or purchased, are investigated to ascertain a reasonable selling price.

DEPRECIATED REPLACEMENT COST (DRC)

A cost approach is a real estate valuation method that surmises that the price someone should pay for a piece of property should not exceed what someone would have to pay to build an equivalent building. In cost approach pricing, the market price for the property is equivalent to the cost of land plus cost of construction, less depreciation. It is often most accurate for fair value when the property is new. Generally, the cost approach considers what the land, devoid of any structures, would cost, then adds the cost of building the structures, then depreciation is subtracted. The cost approach is most often used for public buildings, such as schools and mosques, because it is difficult to find recently sold comparable properties in the local market, and public buildings do not earn income, so the income approach cannot be used, either. A property that already has improvements will usually contribute a certain amount of value to the site, but improvements can also lower property value if the site's potential buyers wish to use the property for another use that would entail removing some of the improvements to the current site. The cost approach is best used when improvements are new and there is adequate pricing information to value the property components. The cost

approach may be less desirable if there are no recent sales of vacant land for which to compare, since the major method of valuing vacant lands is to use the sales comparison approach, or when construction costs are not readily available. The cost approach method includes:

- Estimate what the vacant property would be worth.
- Estimate the current cost of building the structures, then add that value to the value of the vacant land.
- Estimate the amount of accrued depreciation of the subject property, then subtract it from the total to arrive at the property's worth.

CAPITALIZATION METHOD (CAP RATE)

The income approach values property by the amount of income that it can potentially generate. Hence, this method is used for apartments, office buildings, malls, and other property that generates a regular income.

The appraiser calculates the income according to the following steps:

- Estimate the potential annual gross income by doing market studies to determine what the property could earn, which may not be the same as what it is currently earning.
- The effective gross income is calculated by subtracting the vacancy rate and rent loss as estimated by the appraiser using market studies.
- The net operating income (NOI) is then calculated by subtracting the annual operating expenses from the effective gross income. Annual operating expenses include real estate taxes, insurance, utilities, maintenance, repairs, advertising, and management expenses. Management expenses are included even if the owner is going to manage it, since the owner incurs an opportunity cost by managing it herself. The cost of capital items is not included since it is not an operating expense. Hence, it does not include mortgage and interest since this is a debt payment on a capital item.

Estimate the capitalization rate (aka cap rate), which is the rate of return, or yield, that other investors of property are getting in the local market.

4.2 Comparable Method

This method aims to collect data and information on actual sales and / or current offers of similar properties within the surrounding market, and then make the necessary adjustments to these comparisons in terms of area, location, shape, quality, content, and others. Below is a summary of the valuation process using the comparable method and the amendments made to the available comparisons.

Characteristics of Samples

Close to main street	Yes	Yes	0.00%	Yes	0.00%	Yes	0.00%
Total Adjustments Ratio			0.00%		0.00%		5.00%
Total Adjustment Amount			SAR 0.0		SAR 0.0		SAR 142.3
Net After Adjustment			SAR 2,452.4		SAR 2,755.1		SAR 2,988.5
Weighted Mean			70%		15%		15%
			SAR 1,716.67		SAR 413.27		SAR 448.27
SAR / Sqm	SAR 2,578						
Rounded Value	SAR 2,600						

SAR 60,398,996

Based on the market samples obtained with the assistance of some real estate experts in the region and the inspection made by our team, the average price for similar properties falls in the range of 2,200 and 3,000 SAR / Sqm with an average of 2,600 SAR / Sqm. When comparing with the results of the analysis of comparisons, we found that the property value falls within the same range and is close to the market average values.

4.3 Depreciated Replacement Cost (DRC) Approach

As a first step, the cost of reconstructing the building (the cost of replacement) was estimated, based on the average construction costs of similar properties and at the same level of finishes, services, utilities, and others. The opinion of some engineering experts was used in this regard. The following table shows the expected replacement costs for such property.

As per the site inspection done by our team for the purpose of valuation, we have found that the subject property is a customized cold storage warehouse. Yet, the client informed us that the total development cost of the project is 158,200,000 SAR which we believe it is an acceptable value based on the quality. To achieve the value of the property we need to apply the depreciation value and add the land value.

DEVELOPMENT VALUE			
Total Dev Cost	SAR 158,200,000	Annual Dep Rate	5.0%
Total Completion Rate	100%	Actual Age	6
Developer Profit Rate	25%	Total Dep Rate	30.00%
Dev. Profit Amount	SAR 27,685,000	Add Appr Rate	0.00%
Development Value	SAR 138,425,000	Net Dep Rate	30.00%
Economic Age	20	Cost After Depreciation	SAR 110,740,000

In order to determine the full value of the property, the construction costs will be added to the fair value of the land as follows:

Total Dev. Value	Land Value	Total Property Value	Rounded Value
SAR 110,740,000	SAR 54,908,178	SAR 165,648,178	SAR 165,650,000

4.4 Income Approach Based on Market Rates

Market Rental Analysis

The subject property is a cold storage and based on the market survey done by our team and based on the interviews done with local real estate agents, we have found that the rental rates for cold storage similar to the subject property in terms of quality, services, etc (mentioning 3 samples such as Wared Logistics, Storkom, Takhzeen Logistics) falls between 1,050 and 1,150 SAR/ Sqm. We will base our valuation on the average rate 1,100 SAR/ Sqm.

Market Capitalization Rate Analysis

Based on recent transactions of real estate properties and funds, the average capitalization rate of acquiring such property falls in the range of 7% to 9%. This average is mainly driven by several factors such as the quality of the building, finishing materials, the general location, ease of access, actual age of the property, size of the project, and the extent of income stability in it. In addition to the above, the capitalization rates are also affected directly by the supply and demand rates for the same type of real estate

The Capitalization Rate Used for the Valuation

With regard to the capitalization rate used in the valuation, we will base our analysis on the average capitalization rates based on the market and then make some adjustments based on the property situation in terms of its characteristics, location and some other important elements.

With regard to the capitalization rate used in the valuation, we will rely on the averages of the capitalization rate by market and then make some adjustments based on the real estate situation in terms of the following:

- Easy access to the property
- The general condition of the property
- The general location of the property
- Quality of finishes
- Quality and presence of management team
- Services and public utilities

The estimated capitalization rate for the property, which will be based on the valuation process, is 7.25%, which will be applied subsequently to the net operating income of the property.

	Sample 1	Sample 2	Sample 3
Sale Price	7,500,000.00	1,336,080.00	1,930,400.00
Revenue	543,750.00	93,525.60	144,780.00
Capitalization rate	7,25%	7.00%	7.50%
Average capitalization rate	7,25%		

Based on the above, the value of the property using the income capitalization method is as follows:

			Revenues		
	Quantity		Revenues		
Unit Type	Total GLA	No of Units	SAR / Sqm	SAR / Unit	Total Revenues
Cold Storage	16,000	0	SAR 1,100	SAR 0	SAR 17,600,000
				Total Revenues	SAR 17,600,000
Expenses					
Unit Type	Management	Utilities	Maintenance	Others	Total Expenses
Cold Storage	0.00%	0.00%	0.00%	10.00%	10.00%
				Total Expenses	10.00%
Net Operating Income					
Unit Type	Total Revenues		Total Expenses		NOI
Cold Storage	SAR 17,600,000		10.00%		SAR 15,840,000
				Total	SAR 15,840,000
Total Property Revenues					SAR 17,600,000
Total Property Expenses					-SAR 1,760,000
Net Operating Income					SAR 15,840,000.00
Net Operating Income	Cap Rate		Property Value		Rounded Value
SAR 15,840,000.00	7.25%		218,482,758.62		SAR 218,480,000.00

4.5 Income Approach- Leasing Contract

Actual Revenues

The client informed us that the subject property is fully leased to 1 tenant with a triple net of 16,000,000 SAR annually for 5 years.

Market Capitalization Rate Analysis

Based on recent transactions of real estate properties and funds, the average capitalization rate of acquiring such property falls in the range of 7% to 9%. This average is mainly driven by several factors such as the quality of the building, finishing materials, the general location, ease of access, actual age of the property, size of the project, and the extent of income stability in it. In addition to the above, the capitalization rates are also affected directly by the supply and demand rates for the same type of real estate.

The Capitalization Rate Used for the Valuation

With regard to the capitalization rate used in the valuation, we will base our analysis on the average capitalization rates based on the market and then make some adjustments based on the property situation in terms of its characteristics, location and some other important elements.

With regard to the capitalization rate used in the valuation, we will rely on the averages of the capitalization rate by market and then make some adjustments based on the real estate situation in terms of the following:

- Easy access to the property
- The general condition of the property
- The general location of the property
- Quality of finishes
- Quality and presence of management team
- Services and public utilities

The estimated capitalization rate for the property, which will be based on the valuation process, is 7.25%, which will be applied subsequently to the net operating income of the property.

Based on the above, the value of the property using the income capitalization method is as follows:

Revenues					
	Quantity		Revenues		
Unit Type	Total GLA	No of Units	SAR / Sqm	SAR / Unit	Total Revenues
Cold Storage	The subject property is Fully leased to 1 tenant				SAR 16,000,000
				Total Revenues	SAR 16,000,000
Expenses					
Unit Type	Management	Utilities	Maintenance	Others	Total Expenses
Cold Storage	0.00%	0.00%	0.00%	0.00%	0.00%
				Total Expenses	0.00%
Net Operating Income					
Unit Type	Total Revenues		Total Expenses		NOI
Cold Storage	SAR 16,000,000		0.00%		SAR 16,000,000
				Total	SAR 16,000,000
Total Property Revenues					SAR 16,000,000
Total Property Expenses					SAR 0
Net Operating Income					SAR 16,000,000.00
Net Operating Income	Cap Rate		Property Value		Rounded Value
SAR 16,000,000.00	7.25%		220,689,655.17 SAR		SAR 220,690,000.00

4.6 Subject Property Value in Different Approaches

Methodology	Subject of Valuation	Value in Numbers	Value in Letters
DRC Approach	Land + Buildings	SAR 165,650,000	One Hundred Sixty-Five Million Six Hundred Fifty Thousand Saudi Riyals
Income- Contract	Property	SAR 220,690,000	Two Hundred Twenty Million and Six Hundred Ninety Thousand Saudi Riyals
Income- Market	Property	SAR 218,480,000	Two Hundred Eighteen Million and Four Hundred Eighty Thousand Saudi Riyals

4.7 Subject Property Value

We are of an opinion that the total fair value of the subject property taking into consideration the purpose of valuation by using the Income Approach- Market Rates is:

Property Value: 218,480,000 SAR
Two Hundred Eighteen Million and Four Hundred Eighty Thousand Saudi Riyals.
