SCOPE OF WORK

SCOPE OF
WORK

Scope of Work

1.1 Introduction

This report was prepared by WHITE CUBES Co. based on the International Valuation Standards of the Council of International Assessment Standards (IVSC 2022) and the Guide to Practice and Regulations issued by the Saudi Authority of Accredited Valuers (Taqeem), to ensure accurate access to information, the evaluation report must be read in its entirety, our firm is pleased to offer its services to:

Awal Al Malqa Real Estate Company in order to estimate the **fair value** of the property that is being evaluated.

1.2 Purpose of valuation

The client requested that we evaluate the subject properties for **Inclusion in financial statements**.

1.3 Basis of Valuation

Fair Value: IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is based on the principle of an "exit price,"

1.4 Valuation Methods

Depending on the purpose of the valuation, and upon the request of the client, we will apply **the market approach-comparable method, cost approach-DRC method and Income approach- DCF method**.

1.5 Currency

Unless otherwise stated, all values in the report are in Saudi Arabian Riyals.

1.6 Scope of Research

Research plays a pivotal role in the valuation process as it enables a comprehensive analysis of various factors that can significantly influence the value of a property or asset. Our valuation approach involves conducting extensive research and analysis to ensure a robust evaluation. This includes investigating market conditions, studying comparable sales data, examining key property characteristics, assessing income potential, and considering pertinent legal and regulatory factors. By diligently conducting thorough research, we aim to provide an accurate and well-informed assessment of the property or asset's value in this valuation report.

1.7 Property Inspection

As per the context of this valuation report, involves a comprehensive visit to the subject property for the purpose of assessing its physical attributes, performance, and gathering relevant information. This includes examining quantities, specifications, land area, building areas, rental areas, services, public utilities, and various project components. The inspection carried out on **20/11/2023** provided an opportunity to observe and record the property's specifications. It should be noted that this inspection was not a technical examination but rather a visual overview and documentation of all observed aspects. This information forms the basis for expressing an opinion regarding the property's value in this valuation report.

1.8 Information Sources

A comprehensive on-site field survey was undertaken by our team with the primary objective of verifying the accuracy of crucial market information essential for the evaluation process. This involved gathering data on various factors such as nearby asset prices, occupancy rates, and specific details pertaining to the asset under evaluation. The following sources were diligently utilized during the extensive field research:

1. **Property Records:** Property ownership documents such as title deeds and construction permit.
2. **Market Trends:** In-depth analysis of prevailing market trends to understand the dynamics and influences impacting the asset's value within its specific industry or sector.
3. **Income Analysis:** Rigorous assessment of income-related factors, including revenue streams, operating expenses, and potential cash flows, to gauge the asset's financial performance and viability.
4. **Inspection:** Direct observation and meticulous inspection of the asset, encompassing its physical condition, amenities, and any discernible factors that might influence its market value.
5. **Historical Database:** Reference to our extensive historical database housing information on comparable assets to draw meaningful comparisons and insights into market trends, pricing patterns, and value fluctuation over time.
6. **Specialist Agents:** Consultation and engagement with industry experts and agents specializing in the same type of asset to gain valuable insights, expert opinions, and up-to-date market intelligence.

By employing these comprehensive research methodologies, we have ensured the collection of accurate and relevant data, which forms the basis for determining the true market value of the asset under evaluation.

1.9 Assumptions and Special Assumptions

In accordance with the International Valuation Standards, assumptions play a crucial role in the evaluation process. They are considered logical matters that are accepted as facts during the valuation work, without requiring specific verification. These assumptions are acknowledged as soon as they are mentioned and are based on the factual information available at the time of the valuation. The following assumptions have been made for this evaluation report:

1. **Absolute Ownership:** The property under evaluation is assumed to mortgage to Al Rajhi Banking Investment Company., implying that there are no legal or ownership disputes affecting its market value.
2. **Accuracy of Client Information:** It is assumed that all information provided by the client, whether oral or written, is accurate and up to date as of the date of the evaluation.
3. **Valuation Report Scope:** This report focuses on valuation and does not encompass a structural survey. Therefore, utility checks, service checks, soil tests, and similar assessments have not been conducted.
4. **Market-Based Valuation Methodologies:** The valuation methodologies employed in this report are based on market data compiled using our relevant market knowledge and experience. These methodologies provide a framework for estimating the property's value.
5. **Output and Estimates:** The final value presented in this report is derived from the assumptions used, documents received from the client, and relevant market data. However, it is important to note that the estimated output provides an indication of the property's value and should be interpreted as such.

By acknowledging and incorporating these assumptions into the evaluation process, we aim to provide a comprehensive and reliable assessment of the property's market value.

1.10 Use, Distribution, and Publication Restrictions

This report has been prepared by WHITE CUBES Co. to determine the fair value of the assets under evaluation. Please note that there are limitations on the transfer, referencing, and disclosure of this report and its contents to any third party, except as explicitly stated in the contract letter. Any use of this report for purposes other than those specified herein requires prior written consent from WHITE CUBES Co.

1.11 Legal Notes

To the best of our knowledge, there are no ongoing or pending legal notices served on the property, as per the information accessible to us at this time.

PROPERTY DETAILS

PROPERTY
DETAILS

Property and Location Description

2.1 Property Description

The subject property is a residential compound located in Al Malqa district, Riyadh city, Kingdom of Saudi Arabia. The property's title deeds, and construction permit documents confirm a total land area of 15,924.68 square meters and a total built-up area (BUA) of 41,362 square meters composed of 252 residential apartment units, (224) 3 bedrooms apartment and (10) 2 bedrooms apartment and (18) 1 bedroom apartment. During our site inspection conducted for the purpose of valuation, it was observed that the property is open on 4 sides, allowing ample natural light and ventilation. Notably, the property offers a direct view of Hajar Valley Road from the north side, enhancing its desirability and potential accessibility.

2.2 Surrounding Area

The subject property is primarily surrounded by several residential and commercial buildings, adding to its appeal and potential opportunities.

2.3 Ease of Access

The access level of the subject property is classified as Medium due to its location on Hajar Valley Road.

2.4 Infrastructure

All the infrastructural facilities are available in the surroundings and connected to the subject property.

2.5 Title Deed and Ownership

The client has provided us with a copy of the title deeds pertaining to the subject property, which is jointly owned by four title deeds. Here are the details of the subject property:

City	Riyadh	Riyadh	Riyadh	Riyadh
District	Al Malqa	Al Malqa	Al Malqa	Al Malqa
Title deed Type	Electronic	Electronic	Electronic	Electronic
T.D No.	814009006124	814009006125	614004005871	314002002198

Note: The client has provided us with a copy of the Title Deed which was assumed to be correct and authentic. It is not in our scope to run legal diagnosis on any legal document.

2.6 Construction and Buildings

The building permit indicates the maximum permissible BUA approved by the city municipality. However, the actual area may differ from the area mentioned in the building permit. Therefore, the Client has provided us with a copy of the Construction Permit issued by Riyadh Municipality with the below details:

	CP 1	CP 2	CP 3	CP 4
Construction Permit Type	Modification of building plan	Separation	Separation	Separation
Property Type	Residential	Residential	Residential	Residential
Construction Permit No.	1432/5259	1433/15270	1433/15269	1433/15265
Construction Permit Date	26/03/1432	21/08/1433	21/08/1433	21/08/1433
Permit Expiry Date	26/03/1435	21/08/1436	21/08/1436	21/08/1436
	CP 1	CP 2	CP 3	CP 4
Description	Area (Sqm)	Area (Sqm)	Area (Sqm)	Area (Sqm)
Basement	2,052.89	2,052.89	2,052.89	2,052.89
Residential Ground Floor	2,088.00	2,088.20	2,088.00	2,088.00
First Residential Floor	2,555.78	2,555.78	2,555.78	2,555.78
Second Residential Floor	2,380.22	2,380.22	2,380.22	2,380.22
Annex Floor	1,263.56	1,263.56	1,263.56	1,263.56
Total BAU (sqm)	10,340.45	10,340.65	10,340.45	10,340.45

As per the provided construction permit, the total BUA is 41,362 Sqm, which will be used in our valuation analysis.

2.7 Facilities, Amenities and Services

Facilities	
2 Gymnasiums (For Men and Women)	18 Elevators with VVVF System
Services & Amenities	
Pest Control	Security Services
Cleaning Services	General Maintenance
Plumbing Works	Electric Works
Mechanical Works	Home Appliances Maintenance

2.8 Maintenance & Operational Expenses

Based on the information provided to us by the client, the total maintenance and operating costs of the subject property are 1,424,420 SAR per year, which includes all administration, maintenance, operation and general service bills, addition to 7% advertising fees and 2% agreement renewal.

2.9 Building Gross Leasable Area (GLA)

Floor No.	Use	No. of Units	BUA (Sqm)	GLA (Sqm)	Information Source
3 Bed Apt	Residential	224	----	29,783	Rental spaces are obtained from the client
2 Bed Apt	Residential	10	----	930	
1 Bed Apt	Residential	18	----	2,110	

*This rental space is for residential units only.

2.10 Insurance

Based on the information provided to us by the client, the total costs of the subject property are SAR 117,540 insurance premium expenses.

3.3 Sector Brief

In the following we will insert general information about the real estate sector related to the property subject of our valuation and which is intended to give an initial indication of the sector. These information and indicators are estimated based on our experience, the current sector performance and some other historical data collected from our side, In addition to some current economic changes in general.

-  Indicator showing a decrease in the current performance comparing to last year
-  Indicator showing an increase in the current performance comparing to last year
-  Indicator showing a stable position in the current performance comparing to last year

PROPERTY VALUATION

PROPERTY
VALUATION

Property Valuation

4.1 Valuation Methods

With reference to the valuation purpose, taking into consideration the nature of the subject property, we will use the following ticked methods to estimate the fair value of the subject property:

	Market Approach	Cost Approach	Income Approach			
	Comparable method	DRC method	DCF method	Invest. method	Cap. Rate method	RLV method
Land	✓	----	----	----	----	----
Buildings	----	✓	----	----	----	----
Property	----	----	✓	----	----	----

COMPARABLE METHOD

This is the method most are familiar with as it is the accepted method for valuing residential real estate. Typically, this method involves selecting properties with similar characteristics in the same market area that have recently sold. Once those properties are found they are compared to the property in question and a professional appraiser will deduct value from the subject property for comparative deficiencies and increase value for advantages. Typically, this method is required if the investor is seeking conventional financing. For comparable information, property brokers, dealers and estate agents are contacted to ascertain the asking and selling prices for property of the nature in the immediate neighborhood and adjoining areas. Neighboring properties, which have been recently sold or purchased, are investigated to ascertain a reasonable selling price.

DEPRECIATED REPLACEMENT COST (DRC)

A cost approach is a real estate valuation method that surmises that the price someone should pay for a piece of property should not exceed what someone would have to pay to build an equivalent building. In cost approach pricing, the market price for the property is equivalent to the cost of land plus cost of construction, less depreciation. It is often most accurate for fair value when the property is new. Generally, the cost approach considers what the land, devoid of any structures, would cost, then adds the cost of building the structures, then depreciation is subtracted. The cost approach is most often used for public buildings, such as schools and mosques, because it is difficult to find recently sold comparable properties in the local market, and public buildings do not earn income, so the income approach cannot be used, either. A property that already has improvements will usually contribute a certain amount of value to the site, but improvements can also lower property value if the site's potential buyers wish to use the property for another use that would entail removing some of the improvements to the current site. The cost approach is best used when improvements are new and there is adequate pricing information to value the property components. The cost

approach may be less desirable if there are no recent sales of vacant land for which to compare, since the major method of valuing vacant lands is to use the sales comparison approach, or when construction costs are not readily available. The cost approach method includes:

- Estimate what the vacant property would be worth.
- Estimate the current cost of building the structures, then add that value to the value of the vacant land.
- Estimate the amount of accrued depreciation of the subject property, then subtract it from the total to arrive at the property's worth.

DISCOUNTED CASH FLOW (DCF)

The Discounted Cash Flow Method involves estimating net cash flows of an income generating property over specific period of time, and then calculating the present value of that series of cash flows by discounting those net cash flows using a selected "discount rate." A discounted cash flow method (DCF) is a valuation method used to estimate the attractiveness of an income generating property

4.2 Comparable Method

This method aims to collect data and information on actual sales and / or current offers of similar properties within the surrounding market, and then make the necessary adjustments to these comparisons in terms of area, location, shape, quality, content, and others. Below is a summary of the valuation process using the comparable method and the amendments made to the available comparisons.

Characteristics of Samples							
Feature	Subject Property	Sample 1		Sample 2		Sample 3

Property Value	Sensitivity Analysis					
		-10%	-5%	0%	5%	10%
	Land Area	15,925	15,925	15,925	15,925	15,925
	SAR / Sqm	SAR 5,040.0	SAR 5,320.0	SAR 5,600.0	SAR 5,880.0	SAR 6,160.0
SAR 89,180,000	Property Value	SAR 80,260,387	SAR 84,719,298	SAR 89,178,208	SAR 93,637,118	SAR 98,096,029

Based on the market samples obtained with the assistance of some real estate experts in the region and the inspection made by our team, the average price for similar properties falls in the range of 5,000 - 6,200 SAR / Sqm with an average of 5,600 SAR / Sqm. When comparing with the results of the analysis of comparisons, we found that the property value falls within the same range and is close to the market average values.

4.3 Depreciated Replacement Cost (DRC) Approach

As a first step, the cost of reconstructing the building (the cost of replacement) was estimated, based on the average construction costs of similar properties and at the same level of finishes, services, utilities, and others. The opinion of some engineering experts was used in this regard. The following table shows the expected replacement costs for such property.

	Min Cost (SAR / Sqm)	Max Cost (SAR / Sqm)	Average Cost
Concrete Cost	SAR 800	SAR 1,000	SAR 900
MEP	SAR 450	SAR 550	SAR 500
Finishing Materials	SAR 700	SAR 900	SAR 800
Fit outs &Appliance	SAR 900	SAR 1,100	SAR 1,000
Furniture	SAR 750	SAR 850	SAR 800
Site Improvements	SAR 180	SAR 220	SAR 200
Developer Profit	20%	30%	25%

Land			
Land Area	SAR / Sqm		Total Value
15,924.68	SAR 5,600		SAR 89,178,208
Building			
	Unit		Total BUA
Underground	Sqm		SAR 8,212
Ground Floor	Sqm		SAR 8,352
Upper Floors	Sqm		SAR 19,744
Annex	Sqm		SAR 5,054
Fences	Lm		SAR 478
Total (SQM)	41,362.00		

In the following table, we will estimate the direct replacement cost of the property taking into consideration the main components of the building, such as the concrete structure, electromechanical work, finishes, site improvements, etc. Then we will estimate the value of the indirect costs as a percentage of the total direct costs to estimate the total construction costs of the project

Development Cost					
Hard Cost - (Upper Floors)					
	Area	SAR / Sqm	Total	Completion Rate	Total Cost
Skeleton and Block	33,150.44	SAR 900	SAR 29,835,396	100%	SAR 29,835,396
Electro Mechanic	33,150.44	SAR 500	SAR 16,575,220	100%	SAR 16,575,220
Finishing	33,150.44	SAR 800	SAR 26,520,352	100%	SAR 26,520,352

Contingency			SAR 154,262,706	5.00%	SAR 7,713,135
Others			SAR 154,262,706	0.00%	SAR 0
TOTAL				12.10%	SAR 18,665,787.43
Total Hard Cost	SAR 154,262,706			BUA	41,362.00
Total Soft Cost	SAR 18,665,787.43			SAR / Sqm	SAR 4,181
Total Construction Cost	SAR 172,928,493.43			Overall Completion	100%

After knowing the total construction costs at a rate of 4,181 SAR per square meter, we will estimate the economic life of the property according to the type of construction and its general condition, then apply the depreciation rates based on the actual age of the property. The developer's profitability will be added to the property's value after depreciation to reflect the estimated fair value of the building.

DEVELOPMENT VALUE			
Total Dev Cost	SAR 172,928,493	Annual Dep Rate	2.00%
Total Completion Rate	100%	Actual Age	9
Developer Profit Rate	25.0%	Total Dep Rate	18.00%
Dev. Profit Amount	SAR 43,232,123	Add Appr Rate	0.00%
Development Value	SAR 185,033,488	Net Dep Rate	18.00%
Economic Age	50	Cost After Depreciation	SAR 141,801,365

In order to determine the full value of the property, the construction costs will be added to the fair value of the land as follows:

Total Dev. Value	Land Value	Total Property Value	Rounded Value
SAR 185,033,488	SAR 89,178,208	SAR 274,211,696	SAR 274,210,000

4.4 Discounted Cash Flow Method (DCF)

Market Rental Analysis

Based on the market survey done by our team, we have found several compounds classified as class A with an average rental rate shown in the below table and on which we will apply an adjustment to achieve the average rental rates for the subject apartments:

Sample Name	Rental Rates		Adjustments			Rental Rates After Adjust.	
	2 Bedrooms	3 Bedrooms	Compound Classification	Location	Facilities & Amenities	2 Bedrooms	3 Bedrooms
Al Hamra Compound	1,450	1,250	-5%	-5%	-5%	1,233	1,063
Arizona Compound	1,550	1,400	-5%	-5%	-5%	1,318	1,190
Average						1,275	1,126

We have classified the subject property compound as class B, yet and based on the above adjustments (compound classification, location and provided facilities and amenities), we have achieved an average rental rate of 1,275 SAR/ Sqm for 2 bedrooms apartment and 1,150 SAR/ Sqm for 3 bedrooms apartment. The estimated average rate used in 1,200 SAR/ Sqm.

OPEX

As for the operational expenses for such projects covering the maintenance, management, operation, etc., it is usually calculated as 15% from the total expected revenues of the subject property.

Analysis of Operating and Maintenance Expenses

The operating expenses of similar properties reached between 20% to 25% of the total expected income for the property. These ratios depend on the condition and quality of the property and the type of services and public facilities available in the property itself. These ratios are divided into several main categories as follows:

Management expenses	5% to 7%
Operating and maintenance expenses	5% to 6%
General service bills expenses	3% to 4%
Other incidental expenses	2% to 3%

Property Operation and Maintenance Expenses

Based on the information provided to us by the client, the total maintenance and operating costs of the subject property are 1,424,420 SAR per year, which includes all administration, maintenance, operation and general service bills, addition to 7% advertising fees and 2% agreement renewal.

Market Capitalization Rate Analysis

Based on recent transactions of real estate properties and funds, the average capitalization rate of acquiring such property falls in the range of 7% to 8%. This average is mainly driven by several factors such as the quality of the building, finishing materials, the general location, ease of access, actual age of the property, size of the project, and the extent of income stability in it. In addition to the above, the capitalization rates are also affected directly by the supply and demand rates for the same type of real estate.

The Capitalization Rate Used for the Valuation

Regarding the capitalization rate used in the valuation, we will base our analysis on the average capitalization rates based on the market and then make some adjustments based on the property situation in terms of its characteristics, location and some other important elements.

project	The Palm Compound	Al Hamra Oasis Compound	Antara Compound	Qurtubah Compound
Sale price	2,191,000,000.00	850,000,000.00	946,000,000.00	302,000,000.00
Revenue	142,415,000.00	68,000,000.00	75,680,000.00	22,650,000.00
Cap Rate	6.50%	8.00%	8.00%	7.50%
Average Cap Rate	7.50%			

The estimated capitalization rate of the property, which will be based on in the evaluation process, is 7.5%, which will be applied later on the net operating income of the property.

Based on the above, the value of the property using the DCF method is as follows:

2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033

4.5 Subject Property Value in Different Methods

Methodology	Subject of Valuation	Value in Numbers	Value in Letters
DCF Method	Property	SAR 295,700,000	Two Hundred Ninety-Five Million Seven Hundred Thousand Saudi Riyals
DRC Method	Land + Building	SAR 274,210,000	Two Hundred Seventy-Four Million Two Hundred Ten Thousand Saudi Riyals

4.6 Subject Property Value

Based on our analysis utilizing the discounted cash flow (DCF) method and considering the intended purpose of valuation, we have reached the conclusion that the total fair value of the subject property is as follows:

Property Value: SAR 295,700,000
Two Hundred Ninety-Five Million Seven Hundred Thousand Saudi Riyals.
