3.7 Analysis summary

Analysis summary	
Advantages	• The subject property is located near King Abdullah Road.
Disadvantages	• No defects were observed in the property area.
Opportunities	• There are several developmental projects underway in Riyadh, including: • Sedra Project in Riyadh, which is the first fully integrated district by Roshn in the city. It is set to establish a new urban hub in the area surrounding the subject property. • Green Riyadh Project: This initiative aims to plant trees in more than 120 residential neighborhoods across Riyadh. It also includes the development of 3,331 new parks, greening of streets, surroundings of mosques and schools, tree planting in parking areas, and the construction of sidewalks to provide shaded walking paths. These enhancements are designed to encourage healthier modes of transportation for residents and improve connectivity within neighborhoods.
Overall Risks	General risks related to the real estate market. • Risks of financial, economic and natural disasters. • Risks related to foreign exchange • .Political and security risks • Risks related to the application of value-added tax. • Risks related to the implementation of the real estate transaction tax. • Risks related to white land fees. • Risks related to the impact of demand on residential and commercial real estate in the Kingdom of Saudi Arabia • Risks related to the prices of electricity, water and other services. • Competition-related risks. • Risks related to real estate development. • Risks related to the nature of the realization or liquidation of real estate assets. • Risks related to the reduction in the value of real estate assets. • Risks related to regulatory requirements and regulatory oversight. • Risks related to changes in applicable laws and regulations
Property Risks	• The specialized use of this type of real estate asset is limited because the property is an educational facility, and therefore the target group wishing to rent is limited, as it requires specific tenants who have the interest and desire to use it for educational purposes.

Part 4

Valuation

4.1 Valuation Approaches

Principal valuation approaches and Residual Method	
Market Approach	The market approach provides an indication of value by comparing the asset or liability, or both, with similar or matching assets or liabilities for which price information is available. The market approach should always consider the volume of transactions, their frequency, the range of observed prices, and the proximity to the valuation date. The market approach should be applied and given significant weight in the following cases: A) If the subject asset has recently been sold in a transaction suitable for the basis of value. B) If the subject asset or similar assets are frequently traded publicly. C) If there are notable, recent, or repeated transactions in comparable assets.
Income Approach	The income approach provides an indication of value by converting expected cash flows into a single present value. According to this approach, the value of the asset is based on the income or cash flows generated by the asset or the costs it saves. The income approach should be applied and given priority and significant weight in the following cases: A) When the asset's ability to generate income is the key factor affecting its value from the perspective of a market participant. B) When reasonable forecasts are available for the amount and timing of future revenues from the subject asset, but reliable and relevant market comparisons are not available.
Cost Approach	The cost approach provides an indication of value based on the economic principle that a buyer will not pay more for an asset than the cost of acquiring an asset of similar utility, either through purchase or construction, unless there are unjustifiable factors related to time, inconvenience, risk, or other related factors. This approach provides an indication of value by calculating the current cost to replace or reproduce the asset and applying discounts for all forms of depreciation. The cost approach should be applied and given significant weight in the following cases: A) When market participants are able to recreate the asset with the same characteristics as the subject asset, without regulatory or legal constraints, and the asset can be recreated in a timely manner so that participants do not need to pay a significant additional amount to use the subject asset immediately. B) When the asset does not directly generate income, and the unique nature of the asset prevents the effective use of the income and market approaches. C) When the basis of value used is based on the cost of replacement.
Residual Method	The residual method is named as such because it refers to the amount remaining after subtracting all known or expected costs required to complete the development from the expected value of the project upon completion, taking into account the risks associated with completing the project. The resulting value is referred to as the residual value.

4.2 Valuation Analysis

4.2.2 Income Approach- Discounted Cash Flow Method

According to the International Valuation Standards "2025", in the discounted cash flow method, the expected cash flows are discounted to the date of valuation, which results in a present value of the asset.... In some cases, discounted cash flows can include a final value that represents the value of the asset. The asset at the end of the explicit forecast period."
Given the expected change in the income of the subject property and its failure to reach full maturity at current revenue levels, the cash flow method was chosen to valuate the property using the income method and the explicit forecast period was determined in accordance with these inputs.

The explicit forecast period was determined based on the following principles and criteria:

- **Future financial projections of the property**: Including expected revenues and growth rates, using realistic data grounded in market analysis.
- **Consideration of property maturity phases**: Evaluating the time required to achieve revenue stabilization, based on market dynamics and the property's specific operational conditions.
- **Comprehensive risk analysis**: Covering market risks, operational risks, and assumptions related to occupancy and income levels.
- **Market and economic indicators**: Including demand and supply conditions in the sector, as well as broader economic trends impacting the mark

The analysis was conducted using a forward-looking approach that reflects the property's projected future cash flows. These cash flows were discounted using an appropriate discount rate that accounts for the risks associated with the property and overall market conditions. This approach provides an accurate representation of the property's current market value in accordance with international best practices.

4.2.1.1 lease data

The lease contract for the subject property was provided to us by the client according to the following information:

- Tenant: Al-Farabi Colleges for Education Company.
- Contract effective date: 09/15/2020

4.2.1 Income Approach- Discounted Cash Flow Method

4.2.1.2 Market Rent (Educational buildings)

Research and survey operations were conducted to arrive at the income expected to be generated by the property based on comparisons in the area of the subject property. The comparisons referred to in this section represent the best comparisons from our point of view, which give an indication of the values and returns of the subject property. Relative and quantitative adjustments were made between the property. The subject of valuation and the properties compared to them are as follows to reflect the difference in characteristics between these properties and their impact on the value:

5.2 Assumptions and Limiting Conditions

This appraisal is subject to the following assumptions and limiting conditions :

This appraisal is to be used only for the purpose stated herein. While distribution of this appraisal in its entirety is at the discretion of the addressee, individual sections shall not be distributed; this report is intended to be used in whole and not in part.

No part of this appraisal, its value estimates, or the identity of the firm or the appraiser may be communicated to the public through advertising, public relations, media sales, or other media.

All files, work papers and documents developed in connection with this assignment are the property of the appraiser, ESNAD. Information, estimates and opinions are verified where possible, but cannot be guaranteed. Plans and sketches provided are intended to assist the addressee in visualizing the property; no other use of these plans is intended. The work file prepared is an electronic work file and incorporates by reference all pertinent electronic data and analysis files retained by the appraiser.

No hidden or unapparent conditions of the property, subsoil or structure, which would make the property more or less valuable, were discovered by the appraiser or made known to the appraiser. No responsibility is assumed for such conditions or engineering necessary to discover them. Unless otherwise stated, this appraisal assumes there is no existence of hazardous materials or conditions, in any form, on or near the subject property. The appraiser is not qualified to detect hazardous or toxic materials. Such determination would require investigation by a qualified environmental engineer or other expert, and is beyond the scope of this assignment.

The value estimate presented is based upon the assumption that the subject is free and clear of contamination or toxic materials of any kind either upon, or impacting, the subject property. No responsibility is assumed for any environmental conditions, or for any expertise or engineering knowledge required to discover such conditions.

Good title, free of liens, encumbrances and special assessments is assumed. No responsibility is assumed for matters of a legal nature. The subject is assumed to be following all zoning and legal encumbrances.

The valuation report is based on the data available at the time the assignment is completed. Reasonable amendments or modifications to the valuation based on new information made available after the review was completed will be made, as soon as reasonably possible, for an additional fee.

All maps, plans, property specifications and data relied upon by the appraiser and presented herein are assumed to be correct. No survey of the subject properties was made by this appraiser. Inspection of visual components of the subject was made, which should not be utilized as, or in lieu of, an engineering inspection, or an environmental inspection. The valuation report assignment was not based on a requested minimum valuation, a specific review, or the approval of a loan.

Any compensation is not contingent upon any action resulting from the analysis, opinions, or conclusions presented, or the use of the valuation report.

To the best of our knowledge and belief, the statements of fact contained in this appraiser report are true and correct. Furthermore, no known important or materially relevant facts have been withheld.

The valuation report analysis, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are Esnad's unbiased professional analysis, opinions, and conclusions.

The valuation report is predicated on the extraordinary assumption that the subject can be exposed for sale commensurate with the definition of market value contained herein. If found to be false, the opined value may or may not be impacted.

For the purpose of this valuation, ownership is assumed freehold. We were not provided with municipality constriction permit due to unavailability of the documents with the client the time the valuation is conducted. Should any document be found contrary to this assumption, opinion of value is impacted accordingly, and will require further analysis.

5.3 Valuation Standards

5.3.1 Valuation Standards

- All work is carried out in accordance with the Saudi Authority for Accredited Valuers (Taqeem) and the International Valuation Standards ("IVS") published by the International Valuation Standards Council ("IVSC"), by valuers who conform to the requirements thereof. Our valuations may be subject to monitoring by these entities. The valuations are undertaken by appropriately qualified Taqeem valuers.

5.3.2 Valuation Basis

- Our reports state the basis of the valuation and, unless otherwise noted, the basis of valuation is as defined in the "the Red Book". The full definition of the basis, which we have adopted, is either set out in our report or appended to these General Principles.

5.3.3 Assumptions and Special Assumptions

- Where we make an 'assumption' or 'special assumption' in arriving at our valuations, we define these terms in accordance with the "IVS" as follows:
- These types of assumptions generally fall into one of two categories:
- (a) assumed facts that are consistent with, or could be consistent with, those existing at the date of valuation ("Assumption"), and
- (b) assumed facts that differ from those existing at the date of valuation ("Special Assumption").
- All assumptions and special assumptions must be reasonable under the circumstances, be supported by evidence, and be relevant having regard to the purpose for which the valuation is required.
- We will not take steps to verify any assumptions.

5.3.4 Disposal Costs Taxation and Other Liabilities

- No allowances are made for any expenses of realization, or for taxation, which might arise in the event of a disposal. All property is considered as if free and clear of all mortgages or other charges, which may be secured thereon. However, we consider purchaser's costs in investment valuations in accordance with market conventions.
- No allowance is made for the possible impact of potential legislation which is under consideration. Valuations are prepared and expressed exclusive of VAT payments, unless otherwise stated.

5.3.5 Sources of Information

- Where we have been provided with information by the addressee, or its agents, we assume that it is correct and complete and is up to date and can be relied upon. We assume that no information that has a material effect on our valuations has been withheld.

5.3.6 Title and Tenancy Information

- We assume, unless informed to the contrary, that each property has a good and marketable title, that all documentation is satisfactorily drawn and that there are no encumbrances, restrictions, easements or other outgoings of an onerous nature, which would have a material effect on the value of the interest under consideration, nor material litigation pending. Where we have been provided with documentation, we recommend that reliance should not be placed on our interpretation without verification by your lawyers.
- We have assumed that all information provided by the addressee, or its agents, is correct, up to date and can be relied upon.

5.3 Valuation Standards

5.3.7 City Planning, Zoning and Regulations

Information on city planning is, wherever possible, obtained either verbally from local planning authority officers or publicly available in electronic or other sources. It is obtained purely to assist us in forming an opinion of market and should not be relied upon for other purposes. If reliance is required, we recommend that verification be obtained from lawyers that:

I. the position is correctly stated in our report;

II. the property is not adversely affected by any other decisions made, or conditions prescribed, by public authorities;

III. that there are no outstanding statutory notices.

Our valuations are prepared on the basis that the premises (and any works thereto) comply with all relevant statutory regulations, including fire regulations, access and use by disabled persons, control and remedial measures for asbestos in the workplace and any applicable by-laws.

5.3.8 Surveys

Our reports state the basis of the Unless expressly instructed, we do not carry out any survey, nor do we test the services and we, therefore, do not give any assurance that any property is free from defect. Unless stated otherwise in our reports.

5.3.9 Site Conditions

We do not normally carry out or commission investigations on site in order to determine the suitability of ground conditions and services for the purposes for which they are, or are intended to be, put; nor do we undertake archaeological, ecological or environmental surveys. Unless we are otherwise informed, our valuations are on the basis that these aspects are satisfactory and that, where development is contemplated, no extraordinary expenses, delays or restrictions will be incurred during the construction period due to these matters.

5.3.10 Environmental Contamination

Unless expressly instructed, we do not carry out or commission site surveys or environmental assessments, or investigate historical records, to establish whether any land or premises are, or have been, contaminated. Therefore, unless advised to the contrary, our valuations are carried out on the basis that properties are not affected by environmental contamination. However, should our site inspection and further reasonable enquiries during the preparation of the valuation lead us to believe that the land is likely to be contaminated we will discuss our concerns with the client.

5.3.11 Insurance

Unless expressly advised to the contrary we assume that appropriate cover is and will continue to be available on commercially acceptable terms. In particular, we will have regard to the following:

Composite Panels. Insurance cover, for buildings incorporating certain types of composite panel may only be available subject to limitation, for additional premium, or unavailable. Information as to the type of panel used is not normally available. Accordingly, our opinions of value make no allowance for the risk that insurance cover for any property may not be available or may only be available on onerous terms.

Terrorism. Our valuations have been made on the basis that the properties are insured against risks of loss or damage.

Flood and Rising Water Table. Our valuations have been made on the assumption that the properties are insured against damage by flood and rising water table. Unless stated to the contrary our opinions of value make no allowance for the risk that insurance cover for any property may not be available or may only be available on onerous terms.

5.3.12 Outstanding Debts

In the case of property where construction works are in hand, or have recently been completed, we do not normally make allowance for any liability already incurred, but not yet discharged, in respect of completed works, or obligations in favor of contractors, subcontractors or any members of the professional or design team.

5.3.13 Confidentiality and Third-Party Liability

Our Valuations and Reports are confidential to the party to whom they are addressed and for the specific purpose to which they refer, and no responsibility whatsoever is accepted to any third parties. Neither the whole, nor any part, nor reference thereto, may be published in any document, statement or circular, or in any communication with third parties, without our prior written approval of the form and context in which it will appear.

5.3.14 Plans and Maps

All plans and maps included in our report are strictly for identification purposes only, and, whilst believed to be correct, are not guaranteed and must not form part of any contract. All are published under license. All rights are reserved
