Scope of Work

The Scope of work clauses meet the general requirements of Scope of Work Standard No. 101 of the International Valuation Standards as stated in the version of the International Assessment Standards 2025 issued by the Saudi Authority for Accredited Evaluators.

Scope of work Components	Details		
Valuer's	Al-Waleed bin Hamad Al-Zoman	Hamza Al-Din Riad	Osama Al Shaman
	Valuation/Real Estate Branch	Valuation/Real Estate Branch	Valuation/Real Estate Branch
	Membership number: 1210000038	Membership number: 1220001578	Membership number: 1210003841
Commercial registration number	1010608364		
Record date	08/13/1448 AH		
Client	Al khabeer Capital		
Report user	Al khabeer Capital only		
Other users	Al khabeer Capital - Fund Manager and Investors - Reviewers of the Report - Capital Market Authority		
Subject property	The estimated property is a commercial complex with a total land area 41,630 square meters, according to the instrument, and the total area of the buildings 43,625 square meters, according to the building permit.		
Valuation currency	The valuation and all calculations were made in Saudi Riyals		
Purpose of valuation	Accounting purposes		
Value Method	Fair value: It is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date, (Source: International Valuation Standards 2025)		
Research scope	Field survey of the real estate location under valuation and similar properties. In depth research to collect data and analyze it to produce results that serve the desired purpose for this report		
Nature and source of information	In preparing this report, we relied on the information provided to us by the client. We assume that the information is correct. Reliance was placed on this information in order to arrive at the value. We also relied on the information and data from Century 21 and from the previous valuation work, ongoing field survey and the company's research department.		

Scope of work Components	Details
Report Type	The report contains an integrated explanation of all valuation works including steps and data, information, and accounts, and otherwise.
Intended User	This report is prepared for the exclusive use of the client only. The report is prepared for the purpose of the client and it may not be used except for the mentioned purpose and should not be distributed or published or part thereof only after getting an approval from Century21.
Standards Followed	International Valuation standards (IVS - 2025) were followed
Important Assumptions	There are no restrictions on inspection, inquiry, and analysis in the valuation
Conflict of interest	We acknowledge that we (Century21 Saudi) do not have any interest in the real estate, and there is no conflict of interest with the parties and the participating real estate, whether at the present time or possible in the future.
Limitations	We acknowledge that there is no conflict of interest with the parties to the valuation process and the property subject to valuation. The valuation process was carried out completely independently and without any prejudice. Our company does not bear any responsibility for any information received from the customer, which is supposed to be safe and reliable. Our company does not acknowledge the accuracy or completeness of the available data, does not express its opinion, and does not offer any kind of guarantee for the accuracy or completeness of the data except as indicated. It is clearly stated in this report.

Scope of work Components	Details
Important assumptions	- The documents sent by the client were used in the valuation process and the documents were assumed to be authentic. - The valuation was carried out assuming that the property is free of any encroachments or interference. - Our report is prepared assuming that there are no hazardous materials or contamination at the site that would significantly affect the value. We suggest hiring qualified professionals to conduct investigations to confirm the matter.
Special assumptions	- The property is an income-generating commercial center, and therefore - The income method and the cash flow method were relied upon to reach the fair value. In the income method, the cash flow method based on income, the average rents were calculated according to the current rent of the shops due to the scarcity of commercial comparisons in the region. - The leasable areas were calculated according to the statement sent by the client - 36,000 sqm. - When looking at the property, it was found that the vacancy rate was high. Therefore, it was assumed that the vacancy rate was 50% in the first year of cash flows using the income method, and the decrease in vacancy in the coming years was taken into account, assuming high demand in the Tabuk region. - A field survey was conducted to determine the rental prices in the area surrounding the property for the (other rental) categories in the property being evaluated, but we were unable to reach the rental price, and therefore we relied on the prices in the marketing contract sent by the client.
Valuation method	Depending on the purpose of the valuation and the type of property, the income method was relied upon - the cash flow method.

01

Scope of work

Meeting the client and determine the scope of work which involves the purpose of valuation and the basis of value, the parties concerned, valuation date, any special or important assumptions, includes clarity of mandate and its expected outputs.

04

Application of Valuation Methods

Based on the scope of work and analysis of the market the appropriate valuation method is determined. The assumptions and inputs are used to determine the market value.

02

Site Inspection & Analysis

Property inspection and identify its characteristics & specifications, matching documents, and analysis of the property and the surrounding real estate site uses specifying the geographical scope of the research projects and activities appropriate thereof.

05

Estimated Value

The valuation methods used to reach at the final market value of the property are reconciled to arrive at our final estimate of value

03

Data collection and Analysis

Collecting field and market data and analyze market trends and current market indicators that will be relied upon when applying valuation methods.

06

Report Preparation

Prepare the valuation report in accordance with the scope of work to include data & results and outputs that have been reached through the previous stages of work.

Upon inspection of the property, we found that it matches the data received from the client as a commercial complex (i.e. Gallery Mall)

PROPERTY VALUATION

Property Valuation

01

Comparable Method

The market method is an indicator of value by comparing the asset with identical or comparable (similar) assets for which price information is available, and the market method contains the following methods:

- **Comparative transactions method**
- **Indicative method for trade comparisons**

02

Income Method

The income approach provides an indication of value by converting future cash flows into a single present value. According to this method, the value of the asset is determined by referring to the value of the revenues and cash flows that the asset generates or the costs that it provides. The income method contains the following methods:
Cash flow method (DCF)

03

Cost Method

The cost approach provides an indication of value using the economic principle that a buyer will pay no more for an asset than it would cost to acquire an asset of similar utility by either purchasing or building unless time, inconvenience, risk or other factors are involved. The method provides an indication of value by calculating the current cost of replacing or reproducing the asset, then deducting physical wear and tear and all other forms of obsolescence. The cost method contains the following methods:

- **Replacement cost approach**
- **Reproduction cost method**
- **Combination method**
