

Portavac BeFree

More ergonomics. More power. More robust.

Cleaning Excellence
Trusted Swiss Quality

Portavac BeFree

Healthy and convenient
in everyday cleaning

The Portavac BeFree brings a new dimension to building cleaning: maximum freedom of movement paired with ergonomic design. The narrowest corridors, stairs or hard-to-reach areas such as cinemas, aeroplanes or trains can be reached effortlessly. At the same time, the vacuum cleaner is easy on the back, reduces fatigue and makes cleaning more efficient.

Storage capacity

400 W

Power

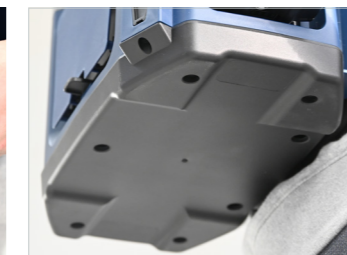

Ergonomic back suction cup

Designed like a Swiss hiking rucksack, the washable carrying frame, which can be removed without tools, optimally distributes the weight on the hips. The low-positioned batteries lower the centre of gravity and noticeably increase comfort.

Extended runtime

The on/off switch attached to the carrying strap has a rotary control for infinitely variable power adjustment – for longer battery life with reduced power.

Robust construction

The rubber-reinforced foot effectively absorbs shocks and prevents damage to the appliance.

Light weight

Weighing just 5.8 kg (including batteries), the Portavac BeFree remains comfortable to carry even on longer jobs and is easy on cleaning staff.

HEPA 13 filter

The three-stage HEPA 13 filter system removes even the smallest particles from the air. The HEPA filter ensures that dirt from the air does not get back into the environment. Suitable for allergy sufferers.

Wetrok battery system

The batteries offer flexible replacement options and are compatible with other Wetrok devices. The charger has a quick charge function.

Clever details

The parking position of the anti-static hose makes it easy to stow away, the carrying position ensures greater freedom of movement, and turning the lid enables right-handed to left-handed operation in seconds.

Optimised cleaning performance

In combination with the turbo nozzle 28, even greater cleaning performance is possible.

The ideal companion for professionals

Cleaning without limits

Whether narrow stairwells, rows of seats in cinemas and public transport or busy areas in hotels – the Portavac BeFree adapts to any environment. Thanks to its clever design, powerful performance and ergonomic construction, it makes daily cleaning easier. Without having to rely on power sockets, the backpack vacuum cleaner offers unrestricted freedom of movement and thus provides noticeable relief and motivated employees.

Stairwells and narrow corridors

Stairs and narrow corridors are often difficult to clean with conventional vacuum cleaners. The Portavac BeFree enables cordless, unrestricted movement and is comfortable to carry – even for long periods of use. Its high suction power ensures that even hard-to-reach corners are thoroughly cleaned.

Public transport

In buses, trains and aeroplanes, every move counts. The compact design and ergonomic carrying system enable quick cleaning even in narrow rows of seats. The anti-static hose prevents unpleasant discharges and reduces dust build-up – for clean and pleasant cleaning in passenger areas.

Hotels and office buildings

Discreet and thorough cleaning is crucial in sensitive areas. The three-stage HEPA 13 filter improves the air quality by retaining the finest particles – ideal for allergy sufferers and hygiene-conscious environments. The quiet operation ensures that guests and employees are not disturbed.

Full suction power ahead

Powerful performance for every challenge

Why is performance so important?

- Powerful suction power for quick and thorough cleaning results
- Flexible power control for different requirements
- Quick-charging function for uninterrupted use
- Quiet operation for trouble-free work

Maximum power for professional applications

The powerful 400 watt motor with infinitely variable power control generates 207 mbar suction power and 36 l/s air flow and removes even stubborn dirt thoroughly and reliably.

Wetrok battery system BeFree – Durable and flexible

You can choose between two different battery options:

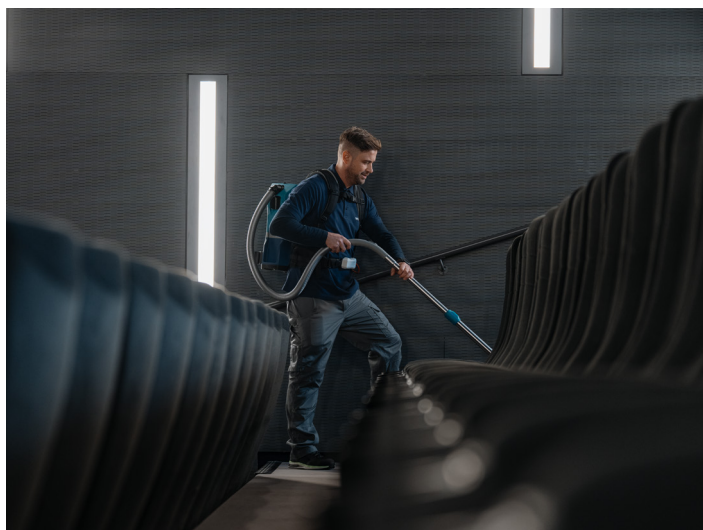

Battery options	Runtime
5 Ah (2 x 18 V)	23 – 45 min
7,5 Ah (2 x 18 V)	34 – 68 min

Thanks to the quick charger, the batteries are fully charged in just one hour. The batteries are compatible with other Wetrok devices, which increases operational flexibility.

Quiet and unobtrusive

The Portavac BeFree works quietly. The power control enables discreet cleaning without disturbing guests or employees. Perfect for sensitive environments such as hotels, offices or hospitals.

With the Portavac BeFree, cleaning staff benefit from an optimum combination of performance, efficiency and comfort!
