

TELESCOPIC WHEEL LOADER.

1. On guard

Front and top window screen guards give increased protection against falling debris.

2. EcoMax performance

4.4 litre JCB engine gives high performance at low revs for increased cycle times.

3. In control

Seat mounted joystick features gear change for ease of use and improved multi-functioning.

5. Well protected

Front and rear light guards protect against damage.

4. Total coverage.

Steel front fender options increase impact resilience.

6. Strength you can rely on

Tough, inverted U-shape boom pressing features fully welded closing plates for ultimate strength.

Belly plates shield engine and driveline from impact damage.

Hydraulic hoses are routed within the main boom structure to guard against damage.

Central high cab position offers unrestricted all-round visibility.

Articulated steering and a telescopic boom allow accurate positioning of loads.

Carbon cab air filters help to minimise dust ingress.
